This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of California. The aircraft include those flown by members of the US Air Force, the US Navy, the US Army, the US Marine Corps, the US Coast Guard, the Air and Army National Guard units, and by various NATO and allied nations as well as a number of aircraft previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 150 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who would like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers, websites and email addresses have been included, along with a list of aircraft held in each museum's current inventory or that on display as gate guardians throughout the state of California. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of California's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and a

good number have been restored to flying condition. This guide-book should help you to find and view California's Warplane survivors.

"More people recognize the importance of Allyship—and that's great. Unfortunately, many men still don't know what they need to do to effect change so everyone feels valued and empowered at work. In Showing Up, Ray Arata provides clear guidance on how to turn good intentions into action. I strongly recommend it to everyone interested in helping create a more equal and productive workplace." —Sheryl Sandberg, COO of Facebook and founder of LeanIn.Org and OptionB.Org Showing Up is a revolutionary step-by-step guide—by and for men—to end toxic masculinity and enact heart-based leadership, increase diversity, bolster the bottom line, and create a workplace culture where everyone wins. The Time's Up, Me Too, and Black Lives Matter movements have sounded a wake-up—especially for men. Organizations

worldwide now realize the critical importance of diversity, equity, and inclusion (DEI) for underrepresented people. It's abundantly clear: the default model of masculinity isn't working for anyone. But for a new and healthier infrastructure, for permanent and transformational shifts, we need a plan that includes men. In *Showing Up*, Ray Arata details the proven methods he's shared with such companies as Verizon, Bloomberg, Moody's, Intel, Toyota, Hearst, and more, teaching men to

- Embrace healthy masculinity as a cornerstone of inclusionary leadership;
- Identify unhealthy masculine behaviors in the workplace—like mansplaining, maninterrupting, and monopolizing;
- Adopt behavior modifications aligned with being an inclusive leader and ally;
- Incorporate specific language to use in healthy discussions; and
- Leverage power and position to elevate underrepresented groups.

Legare Street Press

Chirality in Drug Design and Synthesis is a collection of papers that discusses the property of asymmetry in the structural and synthetic chemistry of natural products, including the significance of chirality in medicinal chemistry. These papers examine the need for the preparation and study of pure enantiomers of chiral drug substances and their mechanism of interaction with enzymes and receptors. These papers also investigate the techniques in studying these interactions, as well as analyze the methods for their synthesis in enantiomerically pure form. One paper discusses the pharmacological and pharmacokinetic analyses made that point to the differences in the activity and disposition of enantiometric pairs. Another paper reviews the implications of the neglect of stereoselectivity at the different levels during the examination process of racemic drugs. Since no general guidelines exist for the development of drugs with chiral centers, one paper suggests a case-by-case approach in evaluating the safety and efficacy of drugs, particularly as regards how isomers differ in their effects. This collection is suitable for the pharmacologist, medicinal chemists, toxicologists, mechanistic chemists and synthetic organic chemists.

This book showcases issues of work and employment in contemporary India through a critical lens, serving as a systematic, scholarly and rigorous resource which provides an alternate view to the glowing metanarrative of the subcontinent's ongoing economic growth in today's globalized world. Critical approaches ensure that divergent and marginalized voices are highlighted, promoting a more measured perspective of entrenched standpoints. In casting social reality differently, a quest for solutions that reshape current dynamics is triggered. The volume spans five thematic areas, subsuming a range of economic sectors. India is a pre-eminent destination for offshoring, underscoring the relevance of global production networks (Theme 1). Yet, the creation of jobs has not transformed employment patterns in the country but rather

accentuated informalization and casualization (Theme 2). Indeed, even India's ICT-related sectors, perceived as mascots of modernity and vehicles for upward mobility, raise questions about the extent of social upgrading (Theme 3). Nonetheless, these various developments have not been accompanied by collective action – instead, there is growing evidence of diminished pluralistic employment relations strategies (Theme 4). Emergent concerns about work and employment such as gestational surrogacy and expatriate experiences attest to the evolving complexities associated with offshoring (Theme 5).
