foralis trading — engineered solutions

After many years ' service, the original two-cycle main engines were replaced with Mitsubishi type S12A2 marine diesels. The new engines are in V-12 configuration and each has a displacement of 33.93 l. (2,071 CID).

The Marine Diesel Engine an Introduction

Their long stroke and low compression minimises stress from vibration to the engine. A Mitsubishi marine engine will give you on average 25% more iron than the competition. A marine engine with larger displacement is far stronger. Larger mass provides greater internal durability for better reliability. Mitsubishi Marine engines are designed to be easy to service. This will save on the cost of maintaining it and reduce the downtime of you machine or vehicle.
