The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by

leapfrogging several steps in their development process.

This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides

evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs

developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to

manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets

of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM. *150 technical questions and answers for job interview*

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future.

Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Trustees at Work explores the role bankruptcy trustees play in determining who qualifies as a deserving debtor under Canadian personal bankruptcy law. The idea of a deserving debtor is woven throughout bankruptcy law, with debt relief being reserved for those debtors deemed deserving. The legislation and case law invite trustees to assess debtors based on their pre-bankruptcy

choices, but in practice, trustees evaluate debtors based on how cooperative the debtors are during bankruptcy proceedings. This book uses interviews and statistical data to explain how the financial and emotional pressures of trustees' work shape their decision-making process. Crime science is precisely
what it says it is: the
application of science to the
phenomenon of crime. This
handbook, intended as a
crime science manifesto,
showcases the scope of the
crime science field and
provides the reader with an
understanding of the
assumptions, aspirations and
methods of crime science, as
well as the variety of topics
that fall within its purview.
Crime science provides a
distinctive approach to
understanding and dealing
with crime: one that is
outcome-oriented, evidence-
based and that crosses
boundaries between
disciplines. The central
mission of crime science is to
find new ways to cut crime
and increase security.

Beginning by setting out the
case for crime science, the
editors examine the roots of
crime science in
environmental criminology and
describe its key features. The
book is then divided into two
sections. The first section
comprises chapters by
disciplinary specialists about
the contributions their
sciences can make or have
already made to crime
science. Chapter 12 of this
