For those of you with a taste
for the mysterious, this book
should prove to be a tempting
prospect. Scotland has
always had a reputation for
holding dark secrets through

the ages and Ron Halliday's new book delves into the subject with descriptive vigour and a clarity that transports the reader to the very heart of the unexplained. With Unidentified Flying Objects, ghosts, the occult and other inexplicable supernatural phenomena included, the book deals with a wide range of well-known and much-researched cases, each strange, disturbing and fascinating in their own way. Many parts of Scotland have provided the stage for these disquieting events, and famous landmarks are mentioned alongside lesser known locations. Halliday's book is worthwhile reading for all who have an interest in the paranormal, not only because it is written in an informative and accessible style, but because it researches events from a country whose name is synonymous with a mysterious past.

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological

aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

About the Book:

Authors have taken special care to present the various topics in Programming with C++ in an easy-to-learn style. Almost every topic is followed by well designed live programmes so that it becomes easy to grasp the underlying principle or programming technique. A total of more than 450 live programmes are included in the book. It is also taken care that programmes are short and do not include such details which do not relate to the topic on hand. This makes them easy to be tested and suitable for practice students. Authors are confident that the book will prove its worth for th.
