I have a mitsubishi ws-65315. Last night my power light was blinking and today it just stays on whenever you plug it in without powering the set on. It started off by powering the tv off and then after a minute or two I could power it back on but now all I get is the green power light and that is it. Any ideas of what I should try?

I am also victim of the green blinking light and my Mitsubishi WS-65513 has no power. I am somewhat handy, but have never repaired a TV before. I have read it may be bad capacitors in DM Module, but not sure. If anyone can offer pics and or step by step instructions and possible dangers, I would greatly appreciate it. creek2205@embarqmail.com
