Using Math in this Millennium 4 Tm Carson-Dellosa Publishing

The Two-Minute Math Drill series was created to help teachers and parents monitor student progress in operations skills. This book focuses on fractions and decimals. It is a great tool to improve student efficiency in absorbing math facts by making use of timed two-minute drill exercises. Students learn one skill at a time and must master each assignment before moving on to the next timed drill. Each exercise includes a brief review of the skill offered in the last timed test before parenting problems involving the new math fact. The first half of the book reinforces operations skill with decimals; the last half focuses on fractions. The final pages include problems involving both fractions and decimals. Students clearly see their progress as they master each skill. They also become more accustomed to working against the clock as they build greater self-confidence in taking the standardized tests they will face in the future.

STAAR Math Practice Grade 4 Carson-Dellosa Publishing

The Problem Every year my students struggled with retaining information about key topics that we covered in math class. Through the years I have tried a variety of Spiral Review math programs with mixed results. Some of these programs required too much of a class time commitment. Others, seemed unfocused or didn't hammer away at key concepts. Frustrated with the options available, I began to experiment and develop The Great 8 Middle School Spiral Review. The classroom has served as my laboratory to test and refine the Great 8. The Basics The Great 8 is a 25 week Spiral Review of key mathematical concepts for middle school. The focal point is for 7th grade, but the Great 8 is also ideal for stronger 6th grade students and 8th and 9th graders that need to review these key concepts. The

Great 8 includes 100 worksheets and 25 Quizzes. Each worksheet and Quiz includes a total of 8 questions. The combination of all the worksheets and Quizzes equals a total of 1,000 questions. Each week includes 4 worksheets and a quiz. How it Works At the beginning of a week a packet of four worksheets is given to each student. The first and third worksheets of the week are the same questions (with different answers) and the second and fourth are also the same. At the end of the week 4 questions are taken from the first/third worksheets and 4 questions are taken from the second/fourth worksheets and are used to create the quiz.
