This book seeks to separate fact from fiction in the global-warming debate. The author begins by describing the history of the Intergovernmental Panel on Climate Change (IPCC) and many other conferences, and their dire predictions on global temperatures, rainfall, weather and climate, while highlighting confusion and sensationalism media reports. He then lays out the "heretical" scientific case of the sizable skeptical scientific community who challenge the accepted wisdom.

A new collection from David Sedaris is cause for jubilation. His recent move to Paris has inspired hilarious pieces, including Me Talk Pretty One Day, about his attempts to learn French. His family is another inspiration. You Cant Kill the Rooster is a portrait of his brother who talks incessant hip-hop slang to his bewildered father. And no one hones a finer fury in response to such modern annoyances as restaurant meals presented in ludicrous towers and cashiers with 6-inch fingernails. Compared by The New Yorker to Twain and Hawthorne, Sedaris has become one of our best-loved authors. Sedaris is an amazing reader whose appearances draw hundreds, and his performances including a jaw-dropping impression of Billie Holiday singing I wish I were an Oscar Mayer weiner are unforgettable. Sedariss essays on living in Paris are some of the funniest hes ever written. At last, someone even meaner than the French! The sort of blithely sophisticated, loopy humour that might have resulted if Dorothy Parker and James Thurber had had a love child.

A beautiful, arresting story about race and the relationships that shape us through life by the legendary Nobel Prize winner—for the first time in a beautifully produced stand-alone edition, with an introduction by Zadie Smith "A puzzle of a story, then—a game.... When [Morrison] called Recitatif an 'experiment' she meant it. The subject of the experiment is the reader." —Zadie Smith, award-winning, best-selling author of White Teeth In this...
1983 short story—the only short story Morrison ever wrote—we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St. Bonaventure shelter. Inseparable then, they lose touch as they grow older, only later to find each other again at a diner, a grocery store, and again at a protest. Seemingly at opposite ends of every problem, and at each other's throats each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Another work of genius by this masterly writer, Recitatif keeps Twyla's and Roberta's races ambiguous throughout the story. Morrison herself described Recitatif, a story which will keep readers thinking and discussing for years to come, as "an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial." We know that one is white and one is Black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? A remarkable look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality, Recitatif is a gift to readers in these changing times.

Both an introduction to film study and a practical writing guide, this brief text introduces students to major film theories as well as film terminology, enabling them to write more thoughtfully and critically. With numerous student and professional examples, this engaging and practical guide progresses from taking notes and writing first drafts to creating polished essays and comprehensive research projects. Moving from movie reviews to theoretical and critical essays, the text demonstrates how an analysis of a film can become more subtle and rigorous as part of a compositional process—

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of Writing New Media bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to
write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

Michael Pollan, the bestselling author of The Omnivore's Dilemma, Food Rules, and How to Change Your Mind, explores the previously uncharted territory of his own kitchen in Cooked. "Having described what's wrong with American food in his best-selling The Omnivore's Dilemma (2006), New York Times contributor Pollan delivers a more optimistic but equally fascinating account of how to do it right.... A delightful chronicle of the education of a cook who steps back frequently to extol the scientific and philosophical basis of this deeply satisfying human activity." —Kirkus (starred review)

Cooked is now a Netflix docuseries based on the book that focuses on the four kinds of "transformations" that occur in cooking. Directed by Oscar-winning filmmaker Alex Gibney and starring Michael Pollan, Cooked teases out the links between science, culture and the flavors we love. In Cooked, Pollan discovers the enduring power of the four classical elements—fire, water, air, and earth—to transform the stuff of nature into delicious things to eat and drink. Apprenticing himself to a succession of culinary masters, Pollan learns how to grill with fire, cook with liquid, bake bread, and ferment everything from cheese to beer. Each section of Cooked tracks Pollan's effort to master a single classic recipe using one of the four elements. A North Carolina barbecue pit master tutors him in the primal magic of fire; a Chez Panisse-trained cook schools him in the art of braising; a celebrated baker teaches him how air transforms grain and water into a fragrant loaf of bread; and finally, several mad-genius "fermentos" (a tribe that includes brewers, cheese makers, and all kinds of picklers) reveal how fungi and bacteria can perform the most amazing alchemies of all. The reader learns alongside Pollan, but the lessons move beyond the practical to become an investigation of how cooking involves us in a web of
social and ecological relationships. Cooking, above all, connects us. The effects of not cooking are similarly far reaching. Relying upon corporations to process our food means we consume large quantities of fat, sugar, and salt; disrupt an essential link to the natural world; and weaken our relationships with family and friends. In fact, Cooked argues, taking back control of cooking may be the single most important step anyone can take to help make the American food system healthier and more sustainable. Reclaiming cooking as an act of enjoyment and self-reliance, learning to perform the magic of these everyday transformations, opens the door to a more nourishing life.

As the United Nations Decade on Biodiversity 2011–2020 comes to a close and countries prepare to adopt a post-2020 global biodiversity framework, this edition of The State of the World’s Forests (SOFO) examines the contributions of forests, and of the people who use and manage them, to the conservation and sustainable use of biodiversity. Forests cover just over 30 percent of the global land area, yet they provide habitat for the vast majority of the terrestrial plant and animal species known to science. Unfortunately, forests and the biodiversity they contain continue to be under threat from actions to convert the land to agriculture or unsustainable levels of exploitation, much of it illegal. The State of the World’s Forests 2020 assesses progress to date in meeting global targets and goals related to forest biodiversity and examines the effectiveness of policies, actions and approaches, in terms of both conservation and sustainable development outcomes. A series of case studies provide examples of innovative practices that combine conservation and sustainable use of forest biodiversity to create balanced solutions for both people and the planet.

MLA Guide to Undergraduate Research in Literature MLA Style Manual and Guide to Scholarly Publishing What habits are common among good college writers? Good college writers are curious, engaged, read critically. They write with purpose. They tune into their audience. They collaborate and seek feedback. They know credible evidence makes them credible researchers. They revise. The Bedford Handbook, based on surveys with more than 1,000 first-year college students, fosters these habits and offers more support than ever before for college reading and writing. New writing guides support students as they compose in an ever-wider variety of genres, including multimodal genres. New reading support encourages students to become active readers. Retooled research advice emphasizes inquiry and helps writers cite even the trickiest digital sources confidently and responsibly. Best of all, the Handbook remains a trusted companion for students because it is accessible, comprehensive, and authoritative. Instructors benefit, too: A substantially revised Instructor’s Edition includes Nancy Sommers’s personal mentoring—more than 100 new concrete tips for teaching with the handbook. Finally,
integrated digital content is easily assignable and helps students practice and apply the handbook’s lessons. The Crown of Columbus chronicles the adventures of a pair of mismatched lovers—Vivian Twostar, a divorced, pregnant anthropologist, and Roger Williams, a consummate academic, epic poet, and bewildered father of Vivian’s baby—on their quest for the truth about Christopher Columbus and themselves. When Vivian uncovers what is presumed to be the most diary of Christopher Columbus, she and Roger are drawn into a journey from icy New Hampshire to the idyllic Caribbean in search of "the greatest treasure of Europe." Lured by the wild promise of redeeming the past, they are plunged into a harrowing race against time and death that threatens—and finally changes—their lives. A rollicking tale of adventure, The Crown of Columbus is also contemporary love story and a tender examination of parenthood and passion.
