As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

Ireland is a country which has come to be defined in part by an ideology which conflates nationalism with the land. From the Irish Revival's celebration of the Irish peasant farmer as the ideal Irishman to the fierce history of land claim battles between the Irish and their colonizers, notions of the land have become particularly bound up with conceptions of what Ireland is and what it is to be Irish. In this book, Wright considers this fraught relationship between land and national identity in Irish literature. In doing so, she presents a new vision of the Irish national landscape as one that is vitally connected to larger geographical spheres. By exploring issues of globalization, international radicalism, trade routes, and the export of natural resources, Wright is at the cutting edge of modern global scholarly trends and concerns. In considering texts from the Romantic era such as Leslie's *Killarney*, Edgeworth's "Limerick Gloves," and Moore's *Irish Melodies*, Wright undercuts the nationalist myth of a "people of the soil" using the very texts which helped to construct this myth. Reigniting the field of Irish Romanticism, Wright presents original readings which call into question politically motivated mythologies while energizing nationalist conceptions that reflect transnational networks and mobility.

The most likely use for Haack's volume will be in introductory pragmatism courses and it is eminently appropriate for this task. However, others who would wish to speak out about pragmatism authoritatively would do well to go through the book from cover to cover. Outside of philosophy, the volume provides an introduction

to a vital aspect of what philosophy has to offer to other disciplines, psychology among them....it is hard to think what could have been done to improve upon the collection.—Metapsychology  
Morris R. Cohen once described pragmatism as a philosophy for people who cannot think; and Bertrand Russell feared that pragmatism would lead philosophy into cosmic impiety. Nothing could be further from the truth. Pragmatism was one of the most fruitful philosophical movements of the late nineteenth century, and has continued to be a significant influence on some of the major figures in philosophy - F. P. Ramsey, W. V. Quine, Sidney Hook, Nelson Goodman, Hilary Putnam, and many others. Today some even speak of a remarkable renaissance of pragmatism. Very often, though, what they have in mind is not the rich heritage of the classical pragmatist tradition, but a radical self-styled neo-pragmatism that has of late transmuted the reformist aspirations of classical pragmatism into a kind of revolutionary anti-intellectualism - a radical neo-pragmatism that seems to confirm Russell's worst fears. Asking what we can learn from the older pragmatist tradition, and what we can salvage from the intellectual shipwreck of the new, Susan Haack, with the assistance of Robert Lane, has put together a wide-ranging anthology that tells the story of the evolution of pragmatism from its origins in C. S. Peirce's hopes of making philosophy more scientific and William James's of unstiffening our theories, to the radical literary-political neo-pragmatism recently popularized by Richard Rorty. Opening with a history of pragmatism from its inception to the present day, and closing with Haack's famous interview with Peirce and Rorty, the book presents a broad and diverse selection of pragmatist writings - classical and contemporary, reformist and revolutionary - on logic, metaphysics, theory of inquiry, philosophy of mind, philosophy of religion, aesthetics, philosophy of education, and moral, social, and political philosophy. Susan Haack (Coral Gables, FL) is Cooper Senior Scholar in Arts and Sciences, professor of philosophy, and professor of law at the University of Miami. She is the author of numerous highly acclaimed books including *Defending Science-Within Reason*; *Philosophy of Logics*; *Evidence and Inquiry*; *Deviant Logic*, *Fuzzy Logic: Beyond the Formalism*; and *Manifesto of a Passionate Moderate: Unfashionable Essays*. Robert Lane (Carrollton, GA) is assistant professor of philosophy at the University of West Georgia. He has published on American philosophy, the history of logic, and ethics.

Recent calls for a return to aesthetics occur precisely at a moment when it is increasingly evident that nothing concerning aesthetics is self-evident anymore. Determined to recover the value of aesthetic experience for artistic, cultural, and social analysis, the contributors to this volume--prominent scholars in literature, philosophy, art history, architecture, history, and anthropology--begin from a shared recognition that ideological readings of the aesthetic have provided invaluable insights, in particular, that analyses of aesthetics within historical and social contexts tell us a great deal about the experience of aesthetic encounters. From multiple and complementary perspectives, the contributors address topics as varied as Nabokov and Dickens, Caravaggio and Shelley Winters, gender and sexuality, advertising and AIDS. Taken together, their essays constitute a sustained and multifarious effort to resituate aesthetic pleasure in the mixed, impure conditions characteristic of every social practice and experience, however privileged or marginalized, and to ask what happens to the aesthetic if we consider it apart from--or at least in tension with--its historically dominant discursive formulations. As such, this volume establishes a renewed sense of aesthetic discourse and its usefulness as a tool for understanding culture.

A dozen essays from a July 1994 conference at the University of San Marino argue that a total shift to electronic information media would trigger wrenching social and cultural dislocations. Among their perspectives are the pragmatics of the new, farewell to the information age, toward meta-reading, hypertext and authorship, and the body of the text. They avoid the usual fetish arguments such as curling up in bed or leather bindings and pipes. Novelist Umberto Eco provides an afterward. No index or word search.
