Report of the Secretary of the Senate from October 1, 1999 to March 31, 2000 Pioneer Solutions

The healthcare landscape in the United States is evolving rapidly but has largely ignored EMS, until recently. As the country focuses on cost containment and more appropriate methods to deliver services as a result of healthcare reform, EMS will need to undergo dramatic change to fill a new role in the healthcare system. The current traditional delivery method for EMS is financially unsustainable and will soon not be a viable option for care. EMS has a choice to make--adapt to the new environment or be left behind. A viable alternative to the current structure of EMS is Mobile Integrated Healthcare (MIH)--community-based health management that is fully integrated with the overall health system. Various programs like this have appeared across the United States, but a definitive resource that describes how to successfully implement such a program

has not been available. Mobile Integrated Healthcare: Approach to Implementation fills this void by serving as a reference not only to the EMS community, but also to other medical professionals working toward implementation of a successful MIH program. Mobile Integrated Healthcare: Approach to Implementation provides a step-by-step approach for the identification of community needs, forming the appropriate partnerships, selection of staff, acquiring resources, patient identification, and overcoming hurdles to a successful program. Examples from successful programs across the country are included. The author team of Mobile Integrated Healthcare: Approach to Implementation has developed and implemented a functioning, successful program. Their experiences with community partners and other healthcare specialists provide a broad-based view of the future of EMS in the healthcare industry. Mobile Integrated Healthcare: Approach to Implementation is written by leaders in the field of EMS who are committed to guiding the successful evolution of EMS. Their approach to integration should be considered by EMS management, hospital-based social workers, and community partners such as county health authorities, homeless coalitions, and psychiatric services. The type of care EMS providers give needs

to evolve with the changing landscape of healthcare. This text describes how healthcare professionals and community partners can work together to facilitate that change and define a successful MIH program.

We don't need to dwell on how we are living in an increasingly competitive and fast-paced world. Conditions that put pressure on companies to change. Not just their markets, operations, and organizations but also their beliefs. Those willing to take risk, step out of their comfort zone and into the discomfort of uncertainty will be those who will reap the biggest rewards. The current playbook just doesn't work anymore, and neither do legacy C/ETRM systems or established expectations on how to implement them. Those ageing designs do not provide the flexibility to evolve with the business, while modern C/ETRM systems are implemented in months instead of years. "So, why get out of your comfort zone and implement a Next Generation C/ETRM system? Because that's where the magic happens! ?Investing in a modern C/ETRM system will support your new playbook for not just surviving but succeeding in today's disruptive business world. This eBook provides C/ETRM solutions crafted to inspire those who lead the way.
