Virtual Lab: Model Ecosystems - Weebly

Model 2 – Estimating Stream Diversity This model is loosely based on the water quality monitoring procedure of the Save Our Streams project of the Izaak Walton League of America. The underlying premise is that water quality affects the biodiversity of a stream. Thus, surveying the macroinvertebrates in a stream is a way to indicate water quality.

Lab: Modeling Ecosystems Virtual Lab - SC TRITON Science

The objective of this lab is to put together a suitable habitat (ecosystem) that will allow one or two guppies to survive to the end of the school year and beyond. Students will make observations of their ecosystems for the three weeks. The ecosystem in this experiment will be closed,...
