Politicians and public managers utilize branding to communicate with the public as well as to position themselves within the ever-present media now so central to political and administrative life. They must further contend with stakeholders holding contradictory opinions about the nature of a problem, the desirable solutions, and the values at stake. Branding is used as a strategy to manage perceptions, motivate stakeholders, communicate clear messages in the media, and position policies and projects. Brands have a unique ability to simplify such messages and motivate different actors to invest their energy in governance processes. Public administration scholars so far have however paid little attention to branding. This book provides a systematic analysis of branding as phenomenon in governance. It deals with the nature of public branding, its relation to existing theories in public administration, the way branding is used as a managerial strategy in governance processes, and the risks and limitations of branding. Branding in Public Governance and Management highlights the growing importance of public banding as a public management strategy to influence political events, decision-making processes and outcomes in governance processes.

In " a book to fascinate pyramid fans, " an egyptologist and an

architect attempt to solve the mystery of the Great Pyramid of Giza ' s construction (Booklist). A decade ago, French architect Jean-Pierre Houdin became obsessed by the centuries-old question: How was the Great Pyramid built? How, in a nation of farmers only recently emerged from the Stone Age, could such a massive, complex, and enduring structure have been envisioned and constructed? Laboring at his computer ten hours a day for five years—creating exquisitely detailed 3-D models of the Pyramid ' s interior—Houdin finally had his answer. It was a startling revelation that cast a fresh light on the minds that conceived one of the wonders of the ancient world. Written by world-renowned Egyptologist Bob Brier in collaboration with Houdin, The Secret of the Great Pyramid moves deftly between the ancient and the modern, chronicling two equally fascinating interrelated histories. It is a remarkable account of the step-by-step planning and assembling of the magnificent edifice—the brainchild of an innovative genius, the Egyptian architect Hemienou, who imagined, organized, and oversaw a monumental construction project that took more than two decades to complete and that employed the services of hundreds of architects, mathematicians, boatbuilders, stonemasons, and metallurgists. Here also is the riveting story of Jean-Pierre Houdin ' s single-minded search for solutions to the mysteries that have bedeviled Egyptologists for centuries, such as the purpose of the enigmatic Grand Gallery and the Pyramid ' s crack. " The authors ' prose is lucid, aided by drawings and photos, and the theories are intriguing. " —Publishers Weekly

The International Conference on the State of the Art on Biogas Technology, Transfer and Diffusion was held in Cairo, Egypt, from 17 to 24 November 1984. The Conference was organized by the Egyptian Academy of Scientific Research and Technology (ASR T), the Egyptian National Research Centre (NRC), the Bioenergy Systems and Technology project (BST) of the US Agency for International Development (US/AID) Office of Energy, and the National Academy of Sciences (NAS). A number of international organizations and agencies co-sponsored the Conference. More than 100 participants from 40 countries attended. The purpose of the Conference was to assess the viability of biogas technology (BGT) and propose future courses of action for exploiting BGT prospects to the fullest extent. The Conference emphasized a balanced coverage of technical, environ mental, social, economic and organizational aspects relevant to biogas systems design, operation and diffusion. It was organized to incorporate experiences that are pertinent, for the most part, to developing countries. In addition to the wide spectrum of presentations and country programs, structured and non-structured discussions among the participants were strongly encouraged in thematic sessions at round-table discussions, and through personal contacts during poster sessions and field trips. It was clear from the enthusiastic response of most participants that the Conference, in large measure, succeeded in fulfilling its mission. Although draft papers were distributed to all participants, it was felt that the results obtained were worthy of organized and refined documentation. And this is precisely what this book intends to do.

National Book Award winning author Pete Hautman lets us in on
the secret. Lita is the writer. Adam is the entrepreneur. They are
JUST FRIENDS. So Adam would never sell copies of a self-help
book before he'd even written it. And Lita would never try to break
up Adam's relationship with Blair, the skankiest girl at school.
They'd never sabotage their friends Emily and Dennis. Lita would
never date a guy related to a girl she can't stand. They'd never steal
each other's blog posts. And Adam would never end up in a fist
fight with Lita's boyfriend. Nope, never. Adam and Lita might
never agree on what happened, but in this hilarious story from Pete
Hautman, they manage to give the world a little more insight into
what boys and girls are really looking for.
