Handbook of Model Rocketry Prentice Hall
Annotation Since the invention of the V-2 rocket during World War II, combustion instabilities

have been recognized as one of the most difficult problems in the development of liquid propellant rocket engines. This book is the first published in the United States on the subject since NASA's Liquid Rocket Combustion Instability (NASA SP-194) in 1972. In this book, experts cover four major subject areas: engine phenomenology and case studies, fundamental mechanisms of combustion instability, combustion instability analysis, and engine and component testing. Especially noteworthy is the inclusion of technical information from Russia and China--a first. Monthly Catalogue, United States Public Documents Parlor Press LLC

Subject Guide to Books in Print

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Paperbound Books in Print Textual Dynamics of the Professions is a collection of fifteen essays examining the real effects of text on professional practices--in academic, scientific, and business settings. Charles Bazerman and James Paradis describe textual dynamics as an interaction in which professional texts and discourses are constructed by, and in turn construct, social practices.

In the burgeoning field of discourse theory, this anthology stands apart in its treatment of a wide range of professional texts, including case studies, student papers, medieval letters, and product instructions, and in the inclusion of authors from a variety of disciplines.

Invaluable to the new pedagogical field of "writing across the curriculum," Textual Dynamics of the Professions is also a significant intervention into the studies of rhetoric, writing theory, and the sociology of knowledge.
