World History: Patterns of Interaction
Holt Mcdougal World History: Patterns of Interaction
Jenna Fischer's Hollywood journey began at the age of 22 when she moved to Los Angeles from her hometown of St. Louis. With a theater degree in hand, she was determined, she was confident, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional actor was so much more vast and competitive than she'd imagined. It would be eight long years before she landed her iconic role on *The Office*, nearly a decade of

frustration, struggle, rejection and doubt. If only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure her in those moments of despair. Jenna wants to be that person for you. With amusing candor and wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, and the importance of joining

forces with other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams (auditions in a guy's apartment are probably not legit—or at least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor.

The Washington Post Notable Non-Fiction of 2013 "I can imagine few more enjoyable ways of thinking than to read this book."—Sarah Bakewell, New York Times Book Review, front-page review Tackling the "darkest question in all of philosophy" with "raffish erudition" (Dwight Garner, New York Times), author Jim Holt explores the greatest metaphysical mystery of all: why is there something rather than nothing? This runaway bestseller, which has captured the imagination of critics and the public alike, traces our latest efforts to grasp the origins of the universe. Holt adopts the role of cosmological

detective, traveling the globe to interview a host of celebrated scientists, philosophers, and writers, "testing the contentions of one against the theories of the other" (Jeremy Bernstein, Wall Street Journal). As he interrogates his list of ontological culprits, the brilliant yet slyly humorous Holt contends that we might have been too narrow in limiting our suspects to God versus the Big Bang. This "deft and consuming" (David Ulin, Los Angeles Times) narrative humanizes the profound questions of meaning and existence it confronts.

"Science has a battle for hearts and minds on its hands...How good it feels to have Lisa Randall's unusual blend of top flight science, clarity, and charm on our side." -Richard Dawkins "Dazzling ideas...Read this book today to understand the science of tomorrow." -Steven Pinker The bestselling author of Warped Passages, one of Time

magazine's "100 Most Influential People in the World," and one of Esquire's "75 Most Influential People of the 21st Century," Lisa Randall gives us an exhilarating overview of the latest ideas in physics and offers a rousing defense of the role of science in our lives. Featuring fascinating insights into our scientific future born from the author's provocative conversations with Nate Silver, David Chang, and Scott Derrickson, Knocking on

Heaven's Door is eminently readable, one of the most important popular science books of this or any year. It is a necessary volume for all who admire the work of Stephen Hawking, Michio Kaku, Brian Greene, Simon Singh, and Carl Sagan; for anyone curious about the workings and aims of the Large Hadron Collider, the biggest and most expensive machine ever built by mankind; for those who firmly believe in the importance of science and rational thought; and for anyone interested in how

the Universe began...and how it might ultimately end.
