" Science has a battle for hearts and minds on its hands....How good it feels to have Lisa

Randall ' s unusual blend of top flight science, clarity, and charm on our side. " —Richard

Dawkins " Dazzling ideas...Read this book today to understand the science of tomorrow. "

—Steven Pinker The bestselling author of Warped Passages, one of Time magazine ' s " 100

Most Influential People in the World, " and one of Esquire ' s " 75 Most Influential People of

the 21st Century, " Lisa Randall gives us an exhilarating overview of the latest ideas in physics

and offers a rousing defense of the role of science in our lives. Featuring fascinating insights into

our scientific future born from the author ' s provocative conversations with Nate Silver, David

Chang, and Scott Derrickson, Knocking on Heaven ' s Door is eminently readable, one of the

most important popular science books of this or any year. It is a necessary volume for all who

admire the work of Stephen Hawking, Michio Kaku, Brian Greene, Simon Singh, and Carl

Sagan; for anyone curious about the workings and aims of the Large Hadron Collider, the

biggest and most expensive machine ever built by mankind; for those who firmly believe in the

importance of science and rational thought; and for anyone interested in how the Universe

began...and how it might ultimately end.

Why Does the World Exist?: An Existential Detective Story BenBella Books

Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January -

June)

Elements of Literature W. W. Norton & Company

Jenna Fischer's Hollywood journey began at the age of 22 when she moved to Los Angeles from her

hometown of St. Louis. With a theater degree in hand, she was determined, she was confident, she was

ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional

actor was so much more vast and competitive than she'd imagined. It would be eight long years before

she landed her iconic role on *The Office*, nearly a decade of frustration, struggle, rejection and doubt. If

only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an

established actor who could educate her about the business, manage her expectations, and reassure her

in those moments of despair. Jenna wants to be that person for you. With amusing candor and wit,

Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable

and hilarious experiences. She tells you how to get the right headshot, what to look for in representation,

and the importance of joining forces with other like-minded artists and creating your own

work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints

on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for

certain scams (auditions in a guy's apartment are probably not legit—or at least not for the kind of part

you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey,

and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards

the life of a professional actor.

Modern Chemistry Holt McDougal

This book presents the proceedings of the International Science and Technology Conference

" FarEastCon 2020, " which took place on October 6 – 9, 2020, in Vladivostok, Russian Federation.

The conference provided a platform for gathering expert opinions on projects and initiatives aimed at

the implementation of far-sighted scientific research and development and allowed current theoretical

and practical advances to be shared with the broader research community. Featuring selected papers

from the conference, this book is of interest to experts in various fields whose work involves developing

innovative solutions and increasing the efficiency of economic activities.

World History Springer Nature

The Washington Post Notable Non-Fiction of 2013 " I can imagine few more enjoyable ways of

thinking than to read this book. " —Sarah Bakewell, New York Times Book Review, front-page review

Tackling the " darkest question in all of philosophy " with " raffish erudition " (Dwight Garner, New

York Times), author Jim Holt explores the greatest metaphysical mystery of all: why is there something

rather than nothing? This runaway bestseller, which has captured the imagination of critics and the

public alike, traces our latest efforts to grasp the origins of the universe. Holt adopts the role of

cosmological detective, traveling the globe to interview a host of celebrated scientists, philosophers, and

writers, " testing the contentions of one against the theories of the other " (Jeremy Bernstein, Wall

Street Journal). As he interrogates his list of ontological culprits, the brilliant yet slyly humorous Holt

contends that we might have been too narrow in limiting our suspects to God versus the Big Bang. This

" deft and consuming " (David Ulin, Los Angeles Times) narrative humanizes the profound questions of meaning and existence it confronts.
