Reprint of the original,  
first published in 1874.

**Algebra in Ancient and  
Modern Times** American  
Mathematical Soc.

Offers a novel perspective on  
the establishment of the  
Turkish nation state and  
highlights how the Young Turk  
regime, from 1913 to 1950,  
subjected Eastern Turkey to  
various forms of nationalist  
population policies aimed at  
ethnically homogenizing the  
region and including it in the  
Turkish nation state.

*The Social Studies* W. W.  
Norton & Company

The author uses an  
historical approach to show  
the advancement of algebra  
from its ancient beginnings  
to its modern usage.

Popular Politics in the Making  
of the Modern Middle East

**Bulletin of the Atomic Scientists**

R. R. Bowker  
The waves of protest ignited by the self-immolation of Muhammad Bouazizi in Tunisia in late 2010 highlighted for an international audience the importance of contentious politics in the Middle East and North Africa. John Chalcraft's groundbreaking account of popular protest emphasizes the revolutionary modern history of the entire region. Challenging top-down views of Middle Eastern politics, he looks at how commoners, subjects and citizens have long mobilised in defiance of authorities. Chalcraft takes examples from a wide variety of protest movements from Morocco to Iran. He forges a new narrative of change over time, creating a truly comparative framework rooted in the dynamics of hegemonic contestation. Beginning with movements under the Ottomans, which challenged corruption and oppression under the banners of religion, justice, rights and custom, this book goes on to discuss the impact of constitutional movements, armed struggles, nationalism and independence, revolution and Islamism. A work of unprecedented range and depth, this volume will be welcomed by undergraduates

and graduates studying protest in the region and beyond.

**Bulletin of the Atomic Scientists**

In cities awakening to global exchange under European imperial rule, Muslims encountered all sorts of strange and wonderful new things—synthetic toothbrushes, toilet paper, telegraphs, railways, gramophones, brimmed hats, tailored pants, and lottery tickets. The passage of these goods across cultural frontiers spurred passionate debates. Realizing that these goods were changing religious

---

practices and values, proponents and critics wondered what to outlaw and what to permit. In this book, Leor Halevi tells the story of the Islamic trials of technological and commercial innovations of the late nineteenth and early twentieth centuries. He focuses on the communications of an entrepreneurial Syrian interpreter of the shari'a named Rashid Rida, who became a renowned reformer by responding to the demand for authoritative and authentic religious advice. Upon migrating to Egypt, Rida founded an Islamic magazine, *The Lighthouse*, which cultivated an educated, prosperous readership within and beyond the British Empire. To an audience eager to know if their scriptures sanctioned particular interactions with particular objects, he preached the message that by rediscovering Islam's foundational spirit, the global community of Muslims would thrive and realize modernity's religious and secular promises. Through analysis of Rida's international correspondence, Halevi argues that religious entanglements with new commodities and technologies were the

driving forces behind local and global projects to reform the Islamic legal tradition. Shedding light on culture, commerce, and consumption in Cairo and other colonial cities, *Modern Things on Trial* is a groundbreaking account of Islam's material transformation in a globalizing era.

*World Literature*

This Handbook presents key ideas of philosophers and social theorists whose ideas inform process approaches to organization studies. Each chapter addresses the background and context of this thinker, their work (with a focus on the processual elements), and the potential contribution to organization and management research.

*The Cumulative Book Index*

Since emerging in the late nineteenth century, political science has undergone a radical shift--from constructing grand narratives of national political development to producing empirical studies of individual political phenomena. What caused this change? *Modern Political Science*--the first authoritative history of Anglophone political science--argues that the field's transformation

shouldn't be mistaken for a case of simple progress and increasing scientific precision. On the contrary, the book shows that political science is deeply historically contingent, driven both by its own inherited ideas and by the wider history in which it has developed. Focusing on the United States and the United Kingdom, and the exchanges between them, *Modern Political Science* contains contributions from leading political scientists, political theorists, and intellectual historians from both sides of the Atlantic. Together they provide a compelling account of the development of political science, its relation to other disciplines, the problems it currently faces, and possible solutions to these problems. Building on a growing interest in the history of political science, *Modern Political Science* is necessary reading for anyone who wants to understand how political science got to be what it is today--or what it might look like tomorrow.
