Biology - Biology - Biology in the 20th and 21st centuries: Just as the 19th century can be considered the age of

cellular biology, the 20th and 21st centuries were characterized primarily by developments in molecular biology. By utilizing modern methods of investigation, such as X-ray diffraction and electron microscopy, to explore levels of cellular organization beyond that visible with a ...

Although modern biology is a relatively recent development, sciences related to and included within it have been studied since ancient times. Natural philosophy was studied as early as the ancient civilizations of Mesopotamia, Egypt, the Indian subcontinent, and China. However, the origins of modern biology and its approach to the study of nature are most often traced back to ancient Greece.
