Student Workbook for Modern Dental Assisting - E-Book Elsevier Health Sciences

An indispensable companion to the 2nd edition of The Administrative Dental Assistant, this workbook combines the key objectives and content of the textbook with challenging exercises, putting the information into a practical context. These exercises also work in conjunction with the tasks presented in the companion CD-ROM, making the Administrative Dental Assistant an even more accurate representation of the challenges that administrative dental assistants will encounter on the job. This new edition includes an interactive demo CD from leading software provider Dentrax. An interactive, networkable demo CD from Dentrax is included, allowing students to access Dentrax's leading practice

management software to perform administrative dental assistant tasks exactly as they would be performed by professionals. Introductory paragraphs in every chapter outline content revisions and changes in the field, along with instructions for using corresponding elements of the Dentrax software. New and revised exercises include short answer, multiple choice, matching, fill in the blank, labeling, and fill-in form exercises drawing on the most current information as presented in the textbook. More than 100 new or colorized images reinforce key points and provide examples of important topics and procedures. Chapter objectives set learning goals for each chapter. Puzzles include crossword, word search, and word scramble puzzles for every chapter, challenging retention of key terms and concepts. Illustrations, charts, and graphs are based on corresponding chapters in the textbook, and reinforce the link between learning and real-world application. With this hands-on resource, you will learn the most current methods of placing -- or assisting in the placement -- of dental materials, and how to instruct patients in their maintenance. Dental

Materials uses step-by-step procedures to show how to mix, use, and apply dental materials within the context of the patient's course of treatment. Expert authors Carol Hatrick, W. Stephan Eakle, and William F. Bird enhance this edition with four new chapters, along with coverage of newly approved materials and esthetic tools including the latest advances in bleaching and bonding. A new companion Evolve website lets you practice skills with challenging exercises! Procedure boxes include step-by-step instructions for common tasks. Procedural icons indicate specific guidelines or precautions that need to be followed for each procedure. End-of-chapter review questions help you assess your retention of material, with answers provided in an appendix. End-of-chapter case-based discussions provide a real-life application of material covered in the chapter. Clinical tips and precautions emphasize important information, advice, and warnings on the use of materials. Key terms are defined at the beginning of each chapter, bolded within the chapter, and defined in the glossary. Objectives help you focus on the information to gain from each chapter. Introductions provide an overview of what will be discussed in each chapter. Summary tables and boxes make it easy to find and review key concepts and information. Full-color photos and illustrations show dental materials and demonstrate step-by-step procedures, including new clinical photos of bleaching and bonding. New Dental Ceramics chapter addresses the growth in esthetic dentistry by discussing porcelain crowns, inlays, and veneers and the process of selecting the proper shade. New Dental Amalgam chapter discusses the use of metal - still the most commonly used material in restorative and corrective dentistry. New Casting Alloys, Solders, and Wrought Metal Alloys chapter breaks down specific types of combination metals and the procedures in which they are used. New Dental Implants chapter covers several different types of implants as well as how to instruct patients on hygiene and home care of their implant(s). The Materials Handling section reflects the new Infection Control Environment (ICE) standards and all approved ADA methods for the disposal of surplus materials. A companion Evolve website includes exercises to help you identify images and master procedures, plus competency skill sheets to assess your understanding.
