*Modern Evolutionary Classification Notes Answer*  
Modern evolutionary classification uses a method called cladistic analysis to determine how clades are related to one another. This information is used

to link clades together into a cladogram, which illustrates how groups of organisms are related to one another by showing how evolutionary lines, or lineages, branched off from common ancestors.

*Lesson Overview Modern Evolutionary Classification*

Answer: the species Ask: Which term, genus or species, is the most inclusive group? Answer: genus Explain that Charles Darwin's ideas about a "tree of life" suggests a new way to classify organisms—based not only on similarities and differences, but also on evolutionary relationships. Under this system, taxa are arranged according to how closely related they are.
