Contemporary Labor Economics, 9e presents the “ new ” labor economics in a readable and logical fashion. The authors' focus in this edition is clearly on labor economics as an applied field of micro and macro theory. This volume is based on the assumption that labor economics is no longer an area tangential to the core of analytical economics but rather a critical component of that core. However, since traditional topics such as labor law, structure of unions, and collective bargaining also play an important role in labor markets, they are also presented. In the Ninth Edition, the authors deliver new and updated discussions of public policy issues and expanded and updated coverage of the current economic crisis.

Labor Supply and Public Policy: A Critical Review deals with the theoretical and empirical econometric research done on the determinants of labor supply and with the effects of public policies on labor supply. This book reviews the various estimates made from studies concerning the economics of labor supply and evaluates the econometric methods that these studies have used. This text also analyzes the labor-supply phenomena, the costs of the different public programs, as well as, the implications of the empirical findings of these studies. The emphasis is on empirical research: many policies that are made depend on the scale of changes in the wage rates and non-market (household) income on hours of work. This book also focuses more on the determinants of the allocation of time between the market and household sectors. The text notes that by using the means of the estimates in the different studies under review, the labor-supply response to public policies involving net wages or income, shows a substantial (but not overwhelming) reaction. This book then correlates this finding with the tax and transfer programs, such as food stamps, unemployment insurance, AFDC (aid to families with dependent children), and NIT (negative income tax). This book is suitable for economists, social workers, and policy makers who are involved in social services, community development, welfare, taxation, labor, and employment.

Modern labor economics has continued to grow and develop since the first volumes of this Handbook were published. The subject matter of labor economics continues to have at its core an attempt to systematically find empirical analyses that are consistent with a systematic and parsimonious theoretical understanding of the diverse phenomenon that make up the labor market. As before, many of these analyses are provocative and controversial because they are so directly relevant to both public policy and private decision making. In many ways the modern development in the field of labor economics continues to set the standards for the best work in applied economics. This volume of the Handbook has a notable representation of authors - and topics of importance - from throughout the world.

Labor Economics, 5e is a well-received text that blends coverage of traditional topics with modern theory and developments into a superb Labor Economics book. The Fifth Edition builds on the features and concepts that made the first four editions successful, updating and adding new content to keep the text on the cusp of recent events in the Labor Economics field. The new edition continues to be the most concise book in the market, enabling the instructor to teach all relevant material in a semester-long class. Despite the book's brevity, the instructor will find that all of the key topics in labor economics are efficiently covered in the Fifth Edition. Thanks to updated pedagogy, new end-of-chapter material, and even stronger instructor support, the Fifth Edition of Labor Economics remains one of the most relevant textbooks in the market.

Contributing to the debate on work performance evaluation in a time of technological transformation, this book explores the impact of digitisation on production and organisation models, as well as on the rights and interests of the stakeholders involved. As organisations down-size, merge with other companies and become decentralised, the boundaries in employer-employee-customer relationships are blurred and new models for the organisation and assessment of work performance have emerged. With these new models, innovative regulatory approaches are sorely needed. Taking an interdisciplinary approach and drawing on theoretical concepts from organisation studies, human resource management, sociology and labour economics, this all-encompassing collection is not only essential reading for academics and students, but also for policy-makers and employers who are looking for innovative and practical solutions to the challenges of modern employment relations.

This textbook presents the "new" labor economics. While traditional topics such as labor law, structure of unions, and collective bargaining are included, the focus is on labor economics as an applied field of micro and macro theory. The authors assert that labor economics has become a critical part of the core of analytical economics and not merely tangential. Micro and Macro Economic principles are the only prerequisites to this one term book.

Modern Labor Economics Routledge

This edition of the introductory text in labor economics develops the modern theory of labor market behavior, summarizes empirical evidence that supports or contradicts each hypothesis, and illustrates the usefulness of the theory for public policy analysis. It presents an overview of demand and supply in labor markets, and deals with labor supply issues, compensation, unionism, public sector labor markets, discrimination, and the macroeconomic issues of inflation and unemployment. The edition provides new discussions of implicit contracting and asymmetric information; selectivity bias in rates of return to education; sex differences in the choice of college majors; firm size and gender effects on quit rates; the effects of union on profitability; and determinants of retirement age. It also includes analyses of state fair employment practice laws and Title VII of the Civil Rights Act. ISBN 0-673-18105-7 : \$26.95.
