Once "warehoused" in institutions, many severely handicapped individuals are now living in community residences. Yet there are few resource materials available for those who face the difficult task of planning and operating these residences. A User's Guide to Community Entry for the Severely Handicapped offers practical guidance for creating the most home-like, least restrictive residential settings. Committed to the right of all individuals to live in their home community, Pancsofar and Blackwell address topics of vital concern to residential planners, administrators, and direct care personnel. The Guide covers administrative and programmatic issues, offering a wealth of suggestions, examples, forms, and

checklists. It is a valuable special education textbook and reference work, and an excellent resource for families.

The Edgeryders guide to the future
International Monetary Fund

This report provides guidance on using the Analytical Tool of the Medium-Term Debt Management Strategy (MTDS). The MTDS framework consists of a methodology, published as the 'Guidance Note for Developing a Medium-Term Debt Management Strategy', and an associated analytical tool (AT) that can be used to assess the cost-risk trade-offs of alternative strategies to help identify the preferred strategy. The MTDS framework supported by the AT quantitative analysis helps to determine the financing strategy. The chosen debt management strategy sets out the financing composition path to meet the debt management objective(s). The profile of future interest payments and the amortizations of new debt are driven by the debt management strategy. The MTDS AT is based on annual cash flow. Although this assumption is enough for analyzing alternative debt management strategies, in some cases, particularly for countries that are heavily dependent on short-term securities with maturities of less than a year, it would be helpful to work with cash flows with higher frequency.
