In their new book, the winners of the TES National Award for Outstanding Literacy Initiative share the secrets behind school improvement through raising literacy levels across the curriculum. Graham Tyrer and Patrick Taylor draw on the successful literacy initiative that raised their school from good to outstanding, as well as their work in three UK schools with a range of Ofsted ratings. The 54 practical strategies are grouped into beginning, embedding, sustaining and evaluating stages and include ideas such as choosing the literacy focus of your school, involving students as literacy leaders and creating a 'Litbox'. Each entry details the literacy outcomes of the strategy, provides step by step guidance for implementing and sustaining it and includes feedback and tips for staff and students who have used it. The Literacy Leader's Toolkit is a must read for all literacy coordinators and leaders who want to implement a whole-school programme, as well as for those teachers who are determined to improve the literacy provision in their classroom.

The Literacy Leader's Toolkit IAS EXAM PORTAL

Progress in International Law is a comprehensive accounting of international law for our times. Forty leading international law theorists analyze the most significant current issues in international law and their critical assessments draw diverse conclusions about the current state and future prospects of international law. The material is grouped under the headings: The History and Theory of International Law; The Sources of International Law and Their Application in the United States; International Actors; International Jurisdiction and International Jurisprudence; The Use of Force and the World's Peace; and The Challenge of Protecting the Environment and Human Rights. The book draws its inspiration from a similar survey undertaken in 1932 by Harvard Law Professor and PCIJ Judge Manley O. Hudson. In his book Progress in International Organization, Hudson sought to demonstrate that what he perceived as an emerging international infrastructure, and as moves toward the rule of law in international affairs, were sure signs of human progress towards peace and cooperation. Progress in International Law critically engages with that claim as a normative matter and, at the same time, presents the evidence by which a judgment about our own progress towards peace and cooperation might be judged.

These papers, deriving from the 7th International Conference on Historical Linguistics (ICHL) in Pavia in 1984, provide an overview of the current status of research in this field. They clearly show that new issues are emerging in the theory of linguistic change which tend to incorporate non-autonomous principles like naturalness in phonetic processes, the influence of socio-cultural settings and discourse pragmatics.
