Naked Mole Rat Gets Dressed Heinemann
More than just a rousing send-up of Shakespeare, Anythynge You Want To: Shakespeare's Lost Comedy is a full-length theatrical entertainment, written and rewritten continually throughout The Firesign Theatre's long performing

career. This volume collects every iambic double entendre and silly soliloquy into a surreal comedy opus, complete with Firesign's "scholarly" Introduction, tongue-in-cheek Footnotes, diagrams, and even recipes! The Firesign Theatre has infused the classic Shakespearian scenes of hurricanes at sea, witches capering about a cooking pot, apparitions on the battlements, graveyard passion, and mortal combat with their notoriously twisted political and social humor. A devastating oil spill, alchemical terrorism, sleezy politics, and Hollywood shenanigans are all part of the laughs. As The Firesign Theatre tells it, the legendary writing/acting quartet has been writing and performing plays since 1600 when they collaborated with the Bard on Anythynge before taking their act on the road to the New World. Reborn in the Old West as Dr. Firesign's Theatre of the Plains, these fighting clowns have since worn many disguises and had countless high adventures on stage, in movies, and over the radio. The tales told here fill in the comic mythology of The Firesign Theatre's most popular recorded worlds, connecting Nick Danger and

George Tirebiter to Hemlock Stones, The Electrician, and "Everything You Know is Wrong." Bonus scripts include 1967's radio saga The Armenian's Paw and an early club-act favorite, Waiting for The Mount of County Crisco. Filled with photographs from performances, along with graphics by Bruce Litz, Anythyng You Want To is truly The Firesign Theatre's major work of high comedy. In an age of increasing complexity, diversification and change, customers expect services that cater to their needs and to their tastes. Emotional Engineering describes how their expectations can be satisfied and managed throughout the product life cycle, if producers focus their attention more on emotion. Emotion plays a crucial role in value recognition, but it is also important for team work, which extends beyond human-human to human-machine and human-environment to enable people to cope with frequently and extensively changing situations. Emotional Engineering proposes the development of services beyond product realization and the creation of value on a lifetime, not just a one-off, basis. As emotion is very much multidisciplinary, chapters cover a wide range of topics that can be applied to product development, including: • emotional design in the virtual environment; • shape design and modeling; • emotional robot competence; and

• affective driving. Emotional Engineering is intended to provide readers with a holistic view of its research and applications, enabling them to make strategic decisions on how they can go further beyond product realization. It is recommended for all pioneers in industry, academia and government, who are trying to work with their customers to create value.

EVERYBODY knew the cat at Farmer Green's to be a great hunter. She had long since disposed of the last mouse that was so foolish as to venture inside her home. And being very big, and not at all timid, she had made such a name for herself in the neighborhood that even the rats looked on her as a monster to be avoided. Now it often happened that this capable cat turned up her nose at the saucer of milk that Farmer Green's wife set before her with great regularity. And off she would go-sometimes to the barn, sometimes to the fields-to see what she could find that would furnish her both food and a frolic. For she thought it great sport to capture some small creature. She was crossing the garden early one morning, on her way to the meadow, when she came upon Grandfather Mole. And having no pity for him-in spite of his blindness-she thought there was no sense in going any further for her breakfast. She would enjoy it right there in the garden. But first she would play with Grandfather Mole, before eating. For she was

a pleasure-loving dame. She must have her sport, no matter if her breakfast waited. Grandfather Mole had blundered that morning. Burrowing his way just under the surface of the ground, he had broken through the sun-baked crust of the garden before he knew it. And as he groped about, surprised to find himself in the open, Miss Kitty had pounced upon him. Grandfather Mole struggled to escape. And his captor let him go, to give herself the pleasure of pouncing upon him again. She knew well enough that he couldn't get away from her. He could run quite spryly for an old gentleman-it is true. But when he couldn't see where he was going, of what use was running? Farmer Green's cat didn't know the answer to that question herself. She captured and freed Grandfather Mole several times. And to tell the truth, she couldn't help wishing he could see, so he could make the game livelier. But she was the sort of cat that believes in making the best of things. And she kept pretending that Grandfather Mole almost got away from her. She would let him run about for a few moments and then she would leap upon him as if she had nearly lost him. It was great fun for the cat. But Grandfather Mole did not enjoy it in the least. He thought such treatment far from neighborly. And he quite agreed with old Mr. Crow, who had come hurrying up to see what was going on.

From a Chef, to a Painter, and to the Principal and Physical Education Teacher, Mole Books shares three beautifully illustrated short stories about Mole and his interaction with some important community helpers who young children may then be able to identify independently. Chef Joe allows Mole to help him create special foods to celebrate Mole's fourth birthday. They make pizza, cheese sandwiches, French fries, and a yummy chocolate cake decorated with colorful gem candy. Painter Jim lets Mole work with him in painting the shed; together they design a colorful masterpiece and in the process learn about primary and secondary colors. In the third story, the school principal and physical education teacher while imparting valuable life lessons sponsor a day at the track where Mole gets to show his running prowess. This picture book for children answers questions little ones may have about the world around them. With colorful illustrations, it offers them insight into a variety of people around us who play important roles in our daily lives.

Chemistry: Imagination and Implication focuses on the importance and impact of chemistry on daily living. This book discusses the essential concepts of

chemistry and its application. Organized into 16 chapters, this book starts with an overview of the experimental facts, principles, and methods of chemistry as an aid in exercising intelligent and informed judgment in instances where controversy surrounds the interaction of chemistry with society or the individual. This text then explores the practical arts of metallurgy, which achieved a considerable degree of sophistication long before they were scientifically understood. The reader is then introduced to the atomic concept, the conservation of mass, as well as to the substances that constitute the living things. Other chapters consider the polymerization of amino acids into peptides and proteins. The final chapter examines the various applications of radioactive isotopes produced in particle accelerators. This book is intended for students and teachers who are involved in a chemistry course.
