Theatre tells it, the legendary writing/acting quartet has been writing and performing plays since 1600 when they collaborated with the Bard on Anythyng before taking their act on the road to the New World. Reborn in the Old West as Dr. Firesign's Theatre of the Plains, these fighting clowns have since worn many disguises and had countless high adventures on stage, in movies, and over the radio. The tales told here fill in the comic mythology of The Firesign Theatre's most popular recorded worlds, connecting Nick Danger and George Tirebiter to Hemlock Stones, The Electrician, and "Everything You Know is Wrong." Bonus scripts include 1967's radio saga The Armenian's Paw and an early club-act favorite, Waiting for The Mount of County Crisco. Filled with photographs from performances, along with graphics by Bruce Litz, Anythyng You Want To is truly The Firesign Theatre's major work of high comedy.

Svasthan Healthcare
In an age of increasing

complexity, diversification and change, customers expect services that cater to their needs and to their tastes. Emotional Engineering describes how their expectations can be satisfied and managed throughout the product life cycle, if producers focus their attention more on emotion. Emotion plays a crucial role in value recognition, but it is also important for team work, which extends beyond human-human to human-machine and human-environment to enable people to cope with

frequently and extensively changing situations. Emotional Engineering proposes the development of services beyond product realization and the creation of value on a lifetime, not just a one-off, basis. As emotion is very much multidisciplinary, chapters cover a wide range of topics that can be applied to product development, including:

- emotional design in the virtual environment;
- shape design and modeling;
- emotional robot competence;
- and • affective driving.

Emotional Engineering is

intended to provide readers with a holistic view of its research and applications, enabling them to make strategic decisions on how they can go further beyond product realization. It is recommended for all pioneers in industry, academia and government, who are trying to work with their customers to create value.
