Foundation Course for NEET (Part 2):
Chemistry Class 9 The Reading Company

This is the chapter slice "What's Different" from the full lesson plan "Word Families: Long Vowels"*

Increase vocabulary, sight word recognition and comprehension as you help your students identify the correct pronunciation of long vowel

phonograms (word families) using real life pictures as an aid. We also highlight the "Dolch" high frequency words which encourage beginning reading skills. As students begin to read and understand more about the onset and rhyme connection found in word families, they will begin to think of words as not only a series of individual letters and sounds, but as easily recognizable segments or chunks of language. Reproducible worksheets include, rhyming, writing, poetry, cloze sentences, riddles and chunking. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy.

Encourage reading skills by highlighting the high frequency words essential for beginning readers. With our resource, students will begin to think of words as not only a series of individual letters and sounds, but as easily recognizable

chunks of language. Make a word by adding an onset, like "sn", to the rime, like "ail". Then, say the word out loud. Finish a sentence by matching words, like "sweep" and "keep", to the boxes that show tall and small letters. Read a sentence, like "We like to glide down the wide slide", and circle all the words that rime. Then, write your own sentences using words that rime. Aligned to your State Standards and written to Bloom's Taxonomy, reproducible writing tasks, rime & onset cards, crossword, word search, comprehension quiz and answer key are also included.

Steve and Susan Zumdahl's texts focus on helping students build critical thinking skills through the process of becoming independent problem-solvers. They help students learn to think like a chemists so they can apply the problem solving process to all aspects of their lives. In CHEMISTRY: AN ATOMS FIRST APPROACH, the Zumdahls use a meaningful approach that begins with the atom and proceeds through the concept of molecules, structure, and bonding, to more complex materials and their properties. Because this approach differs from what most students have experienced in high school courses, it encourages them to focus on conceptual learning early in the course, rather than relying on memorization and a plug and chug method of problem solving that even the best students can fall back on when confronted with familiar material. The atoms first organization provides an opportunity for students to use the tools of critical

thinkers: to ask questions, to apply rules and models and to evaluate outcomes.
