Born in Italy, University of Chicago economist Luigi Zingales witnessed firsthand the consequences of high inflation and unemployment—paired with rampant nepotism and cronyism—on a country's economy. This experience profoundly shaped his professional interests, and in 1988 he arrived in the United States, armed with a political passion and the belief that economists should not merely interpret the world, but should change it for the better. In A Capitalism for the People, Zingales makes a forceful, philosophical, and at times personal argument that the roots of American capitalism are dying, and that the result is a drift toward the more corrupt systems found throughout Europe and much of the rest of the world. American capitalism, according to Zingales, grew in a unique incubator that provided it with a distinct flavor of competitiveness, a meritocratic nature that fostered trust in markets and a faith in mobility. Lately, however, that trust has been eroded by a betrayal of our pro-business elites, whose lobbying has come to dictate the market rather than be subject to it, and this betrayal has taken place with the complicity of our intellectual class. Because of this trend, much of the country is questioning—often with great anger—whether the system that has for so long buoyed their hopes has now betrayed them once and for all. What we are left with is either anti-market pitchfork populism or pro-business technocratic insularity. Neither of these options presents a way to preserve what the author calls “the lighthouse” of American capitalism. Zingales argues that the way forward is pro-market populism, a fostering of truly free and open competition for the good of the people—not for the good of big business. Drawing on the historical record of American populism at the turn of the twentieth century, Zingales illustrates how our current circumstances aren't all that different. People in the middle and at the bottom are getting squeezed, while people at the top are only growing richer. The solutions now, as then, are reforms to economic policy that level the playing field. Reforms that may be anti-business (specifically anti-big business), but are squarely pro-market. The question is whether we can once again muster the courage to confront the powers that be.

It was another day at the ranch, training horses and working fifteen hour days. And then the last person I ever expected showed up. Lake McCain: a Marine, tall, ripped—and the best friend of my dead fiancé. Cal died to save Lake, and now Lake claims that he carries a debt to me that he can never repay. I wanted to brush him off. But then my mom, the manager of the ranch, went and hired him. We spend hours working together with the horses. Lake doesn’t say much. He’s layered and dark and he tries to seem shallow and simple. An original and engaging account of the Obama years from a group of leading political historians Barack Obama's election as the first

African American president seemed to usher in a new era, and he took office in 2009 with great expectations. But by his second term, Republicans controlled Congress, and, after the 2016 presidential election, Obama's legacy and the health of the Democratic Party itself appeared in doubt. In The Presidency of Barack Obama, Julian Zelizer gathers leading American historians to put President Obama and his administration into political and historical context. These writers offer strikingly original assessments of the big issues that shaped the Obama years, including the conservative backlash, race, the financial crisis, health care, crime, drugs, counterterrorism, Iraq and Afghanistan, the environment, immigration, education, gay rights, and urban policy. Together, these essays suggest that Obama's central paradox is that, despite effective policymaking, he failed to receive credit for his many achievements and wasn't a party builder. Provocatively, they ask why Obama didn't unite Democrats and progressive activists to fight the conservative counter-tide as it grew stronger. Engaging and deeply informed, The Presidency of Barack Obama is a must-read for anyone who wants to better understand Obama and the uncertain aftermath of his presidency. Contributors include Sarah Coleman, Jacob Dlamini, Gary Gerstle, Risa Goluboff, Meg Jacobs, Peniel Joseph, Michael Kazin, Matthew Lassiter, Kathryn Olmsted, Eric Rauchway, Richard Schragger, Paul Starr, Timothy Stewart-Winter, Thomas Sugrue, Jeremi Suri, Julian Zelizer, and Jonathan Zimmerman. Congressional Record Index Strategic Book Publishing Eve knew the stories of the Fall, of a time before she wandered into the colony of Eden, unable to recall anything but her name. She's seen the aftermath of the technology that infused human DNA with cybernetic matter, able to grow new organs and limbs, how it evolved out of control. The machine took over and the soul vanished. A world quickly losing its humanity isn't just a story to her though. At eighteen, this world is Eve's reality. In their Fallen world, love feels like a selfish luxury, but not understanding what it is makes it difficult to choose between West, who makes her feel alive but keeps too many secrets, and Avian, who has always been there for her, but is seven years her senior. The technology wants to spread and it won't stop until there is no new flesh to assimilate. With only two percent of the human population left, mankind is on the brink of extinction. While fighting to keep Eden alive, Eve will discover that being human is about what you will do for those you love, not what your insides may be made of. And even if it gets you killed, love is always what separates them from the Fallen. In the Place of Justice Annie K. Playing It Kale Vintage Crime/Black Lizard With the aptly titled Bad Republican, Meghan McCain expresses how it is to feel like you no longer fit in with your political party. She tells of growing up the daughter of an American icon who shaped her life and details the heartbreaking final moments spent by his side. She recalls her (mis)adventures on the New York dating scene and brings us up to speed on meeting her now-husband. We hear her views on cancel culture and internet trolls as well as life backstage as the sole Republican at America’s most-watched daytime talk show—and why she decided to leave. Revealingly, she relays the awkward phone call she received from Donald and Melania and where she thinks the Republican Party and the country go from here. And with surprising candor, she divulges why a miscarriage and the birth of her daughter have left her so fired up about women’s rights—even if that puts her at odds with her party. Unsparingly honest, deeply relatable, and highly entertaining, Bad Republican is as personal as a story gets. It’s a memoir imbued with an unmistakable maverick spirit. He's sweet and kind and insanely adorable, and comes from a wonderful family. He is everything I want. The chemistry between us? It's there in spades. It was one of the scariest things I'd ever done: walking out on stage, opening my mouth, and singing for everyone at that wedding to hear. Because I'm awkward. I always mess things up, I forget my lyrics, and guaranteed, I'll do something weird. I'm a nerd, a lab assistant. Not a pop star. But that night, I met someone who changed my life forever. Kale McCain. World-famous model, ladies' man, not a flaw to him. And

the most unexpected thing happened--sparks flew. Everything about Kale is smooth: his attitude, his voice, his body... He is my polar opposite. But somehow, him-me, we work. Then there was the video he made. Us together, me singing, him grinning like I was the sun, moon, and stars. And my simple life exploded. Suddenly, the world has a new celebrity couple to obsess about. We've barely started a relationship. Now there's all this pressure. When our once seemingly perfect life gets shaken, will we come out stronger, or will what everyone has been saying about us--that this is too quick, too serious, and that we're too young for this to be real--come to truth? I'm Whitney Ford, and from the second Kale McCain walked into my life, I knew it would never be the same.

Argumentation is often understood as a coherent set of Western theories, birthed in Athens and developing throughout the Roman period, the Middle Ages, the Enlightenment and Renaissance, and into the present century. Ideas have been nuanced, developed, and revised, but still the outline of argumentation theory has been recognizable for centuries, or so it has seemed to Western scholars. The 2019 Alta Conference on Argumentation (co-sponsored by the National Communication Association and the American Forensic Association) aimed to question the generality of these intellectual traditions. This resulting collection of essays deals with the possibility of having local theories of argument - local to a particular time, a particular kind of issue, a particular place, or a particular culture. Many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse. Other scholars are more comfortable with the Western traditions, and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances. The papers represent different methodologies, cover the experiences of different nations at different times, examine varying sorts of argumentative events (speeches, court decisions, food choices, and sound), explore particular personal identities and the issues highlighted by them, and have different overall orientations to doing argumentation scholarship. Considered together, the essays do not generate one simple conclusion, but they stimulate reflection about the particularity or generality of the experience of arguing, and therefore the scope of our theories.

The Presidency of Barack Obama Keary Taylor Book, INC  
Both John McCain and Barack Obama have background stories resplendent with courage and success-stories that highlight all that is best about America. In The Race for the White House 2008, author T.K. White looks at these two very different men and their quests for the highest office in the land. This is an insider's view of the Republican and Democratic strategies that have defined the 2008 campaigns and the role that political consultants have played in shaping politics and public policy. It is a case study of the troubles of the McCain campaign, the problems of its own making as well as those caused by forces beyond the campaign's control, including a deeply troubled economy that sharply drove up home foreclosures in many states. And it provides vivid evidence of the Obama campaign's success in using its money and organizational skills to put Republicans on the defensive in once-safe states. In this election, unlike so many others, the traditional pattern of focusing on the opponent and using underhanded methods has failed.This is a presidential campaign in which various forces including luck, natural political skill, the right-leaning slant of the country and political outmaneuvering have come together to form the most diverse and controversial campaign of our time. White's account provides an original narrative of the behind-the-scenes machinations of the past two years as well as the strategies, the causes and the consequences of The Race for the White House 2008.
