Technology is changing money: it has been transformed from physical objects to intangible information. With the arrival of smart cards, mobile phones and Bitcoin it has become easier than ever to create new forms of money. Crucially, money is also inextricably connected with our identities. Your card or phone is a security device that can identify you - and link information about you to your money. To see where these developments might be taking us, David Birch looks back over the history of money, spanning thousands of years. He sees in the past, both recent and ancient, evidence for several possible futures. Looking further back to a world before cash

and central banks, there were multiple 'currencies' operating at the level of communities, and the use of barter for transactions. Perhaps technology will take us back to the future, a future that began back in 1971, when money became a claim backed by reputation rather than by physical commodities of any kind. Since then, money has been bits. The author shows that these phenomena are not only possible in the future, but already upon us. We may well want to make transactions in Tesco points, Air Miles, Manchester United pounds, Microsoft dollars, Islamic e-gold or Cornish e-tin. The use of cash is already in decline, and is certain to vanish from polite society. The newest technologies will take money back to its origins: a substitute for memory, a record of mutual debt obligations within multiple overlapping communities. This time though, money will be smart. It will be money that reflects the values of the communities that produced it. Future money will know where it has been, who has been using it and what they have been using it for.

Money and Banking - SBPD Publications Oswaal Books

Money and Financial Systems by Dr. V. C. Sinha and Dr. J. C. Varshney is a publication of SBPD Publishing House, Agra. This book is addressed to the students of monetary economics. Much of the discussion in the book relates to the financial institutions, theory of money and credit supply and monetary and credit policy. In the 1990's, the economic reforms were started in the Indian economy and financial sector reforms were the key to these reforms. Therefore, in the past one decade or more, the financial sector in India has undergone historical changes. The authors have tried to incorporate all those changes in the book and have given the latest picture of the financial sector to the students.
