“ Mervyn King may well have written the most important book to come out of the financial crisis. Agree or disagree, King’s visionary ideas deserve the attention of everyone from economics students to heads of state. ” —Lawrence H. Summers Something is wrong with our banking system. We all sense that, but Mervyn King knows it firsthand; his ten years at the helm of the Bank of England, including at the height of the financial crisis, revealed profound truths about the mechanisms of our capitalist society. In *The End of Alchemy* he offers us an essential work about the history and future of money and banking, the keys to modern finance. The Industrial Revolution built the foundation of our modern capitalist age. Yet the flowering of technological innovations during that dynamic period relied on the widespread adoption of two much older ideas: the creation of paper money and the invention of banks that issued credit. We take these systems for granted today, yet at their core both ideas were revolutionary and almost magical. Common paper became as precious as gold, and risky long-term loans were transformed into safe short-term bank deposits. As King argues, this is financial alchemy—the creation of extraordinary financial powers that defy reality and common sense. Faith in these powers has led to huge benefits; the liquidity they create has fueled economic growth for two centuries now. However, they have also produced an unending string of economic disasters, from hyperinflations to banking collapses to the recent global recession and current stagnation. How do we reconcile the potent strengths of these ideas with their inherent weaknesses? King draws on his unique experience to present fresh interpretations of these economic forces and to point the way forward for the global economy. His bold solutions cut through current overstuffed and needlessly complex legislation to provide a clear path to durable prosperity and the end of overreliance on the alchemy of our financial ancestors.

Young people, hardest hit by the global economic downturn, are speaking out and demanding change. F&D looks at the need to urgently address the challenges facing youth and create opportunities for them. Harvard professor David Bloom lays out the scope of the problem and emphasizes the importance of listening to young people in "Youth in the Balance." "Making the Grade" looks at how to teach today's young people what they need to get jobs. IMF Deputy Managing Director, Nemat Shafik shares her take on the social and economic consequences of youth unemployment in our "Straight Talk" column. "Scarred Generation" looks at the effects the global economic crisis had on young workers in advanced economies, and we hear directly from young people across the globe in "Voices of Youth." Renminbi's rise, financial system regulation, and boosting GDP by empowering women. Also in the magazine, we examine the rise of the Chinese currency, look at the role of the credit rating agencies, discuss how to boost the empowerment of women, and present our primer on macroprudential regulation, seen as increasingly important to financial stability. People in economics - C. Fred Bergsten, American Globalist. Back to basics - The multi-dimensional role of banks in our financial systems.

This book is an extremely readable guide to the world of international finance by two former City Editors of The Times. It is designed for people who want to understand something of the world's financial affairs and learn how to follow jargon on the City pages of newspapers or money programmes on radio and television. Starting with the basic facts, the authors gently guide you through the world's money maze - so that by the time you have reached the last chapter you should be able to understand the newspaper extracts printed at the end of the book. The World's Money aims to answer some of the many questions of the times in which it was published: Why had there been so many monetary crises? How were they caused? What is the role of gold in international finance? How do exchange rates, the IMF, the World Bank, the eurodollar market work? What is the new World Money? How was the pound devalued? Can 1929 recur? The material is equally suitable for students, sixth-formers, economists and the armchair reader. Contemporary events are used as examples and illustrations, the history and the future of money discussed, so that the book is at once topical for its times and of lasting value.

Winner of best book by a foreign author (2019) at the Business Book of the Year Award organised by PwC Russia The future of banking is already here — are you ready? Bank 4.0 explores the radical transformation already taking place in banking, and follows it to its logical conclusion. What will banking look like in 30 years? 50 years? The world's best banks have been forced to adapt to changing consumer behaviors; regulators are rethinking friction, licensing and regulation; Fintech start-ups and tech giants are redefining how banking fits in the daily life of consumers. To survive, banks are having to develop new capabilities, new jobs and new skills. The future of banking is not just about new thinking around value stores, payment and credit utility — it's embedded in voice-based smart assistants like Alexa and Siri and soon smart glasses which will guide you on daily spending and money decisions. The coming Bank 4.0 era is one where either your bank is embedded in your world via tech, or it no longer exists. In this final volume in Brett King's BANK series, we explore the future of banks amidst the evolution of technology and discover a revolution already at work. From re-engineered banking systems, to selfie-pay and self-driving cars, Bank 4.0 proves that we're not on Wall Street anymore. Bank 4.0 will help you: Understand the historical precedents that flag a fundamental rethinking in banking Discover low-friction, technology experiences that undermine the products we sell today Think through the evolution of identity, value and assets as cash and cards become obsolete Learn how Fintech and tech "disruptors" are using behaviour, psychology and technology to reshape the economics of banking Examine the ways in which blockchain, A.I., augmented reality and other leading-edge tech are the real building blocks of the future of banking systems If you look at individual technologies or startups disrupting the space, you might miss the biggest signposts to the future and you might also miss that most of we've learned about banking the last 700 years just isn't useful. When the biggest bank in the world isn't any of the names you'd expect, when branch networks are a burden not an asset, and when advice is the domain of Artificial Intelligence, we may very well have to start from scratch. Bank 4.0 takes you to a world where banking will be instant, smart and ubiquitous, and where you'll have to adapt faster than ever before just to survive. Welcome to the future.
