The United States annually spends over \$300 billion on public elementary and secondary education. As the nation enters the 21st century, it faces a major challenge: how best to tie this financial investment to the goal of high levels of achievement for all students. In addition, policymakers want assurance that education dollars are being raised and used in the most efficient and effective possible ways. The book covers such topics as: Legal and legislative efforts to reduce spending and achievement gaps. The shift from "equity" to "adequacy" as a new standard for determining fairness in education spending. The debate and the evidence over the productivity of American schools. Strategies for using school finance in support of broader reforms aimed at raising student achievement. This book contains a comprehensive review of the theory and practice of financing public schools by federal, state, and local governments in the United States. It distills the best available knowledge about the fairness and productivity of expenditures on education and assesses options for changing the finance system.

Financial regulation can fail when it is needed the most. The dynamics of asset price bubbles weaken financial regulation just as financial markets begin to overheat and the risk of crisis spikes. At the same time, the failure of financial regulations adds further fuel to a bubble. This book examines the interaction of bubbles and financial regulation. It explores the ways in which bubbles lead to the failure of financial regulation by outlining five dynamics, which it collectively labels the "Regulatory Instability Hypothesis." The book concludes by outlining approaches to make financial regulation more resilient to these dynamics that undermine law.

An eye-opening look inside pre-K in America and what it will take to give all children the best start in school possible. At the heart of this groundbreaking book are two urgent questions: What do our young children need in the earliest years of school, and how do we ensure that they all get it? Cutting-edge research has proven that early childhood education is crucial for all children to gain the academic and emotional skills they need to succeed later in life. Children who attend quality pre-K programs have a host of positive outcomes including better language, literacy, problem-solving and math skills down the line, and they have a leg up on what appears to be the most essential skill to develop at age four: strong self-control. But even with this overwhelming evidence, early childhood education is at a crossroads in America. We know that children can and do benefit, but we also know that too many of our littlest learners don't get that chance—millions of parents can't find spots for their children,

---

or their preschoolers end up in poor quality programs. With engrossing storytelling, journalist Suzanne Bouffard takes us inside some of the country ' s best pre-K classrooms to reveal the sometimes surprising ingredients that make them work—and to understand why some programs are doing the opposite of what is best for children. It also chronicles the stories of families and teachers from many backgrounds as they struggle to give their children a good start in school. This book is a call to arms when we are at a crucial moment, and perhaps on the verge of a missed opportunity: We now have the means and the will to have universal pre-kindergarten, but we are also in grave danger of not getting it right.

According to Brett Nelson's recent article in Forbes, Financial Illiteracy is Killing Our Kids. Our education system is the source of this problem. Our population needs to be financially literate in order to compete in the global economy in the future, and we are failing our kids. Three-quarters of high school seniors failed a financial literacy test given by Jump\$tart Coalition in 2008, and only 5% earned better than a "C". 5 percent! But there is hope and this book is designed to provide parents of teenaged children recommendations. I recommend that parents purchase this book, and review it together with your children to ensure they understand everything that is critically important to start a life without financial worries.
