'Courageous...memorable...moving' - Guardian 'One of our most exciting young writers' - The Times 'Life-affirming, beautiful and achingly poignant' - Donal Ryan 'Isn't the life of any person made up out of the telling of two tales, after all? The whole world makes more sense if you remember that everyone has two lives, their real lives and their dreams, both stories only a tape's breadth apart from each other, impossibly divided, indivisibly close.' Every year, Robert's family comes together at a rambling old house to celebrate his birthday. Aunts, uncles, distant cousins - it has been a milestone in their lives for decades. But this year Robert doesn't want to be reminded of what has happened since they last met - and nor, for quite different reasons,

does his granddaughter Kate. Neither of them is sure they can face the party. But for both Robert and Kate, it may become the most important gathering of all. As lyrical and true to life as Norris's critically acclaimed debut Five Rivers Met on a Wooded Plain, which won a Betty Trask Award and was shortlisted for the Ondaatje Prize and Debut of the Year at the British Book Awards, this is a compelling, emotional story of family, human frailty, and the marks that love leaves on us.

The work of Giorgio Agamben, one of the world's most important living philosophers, has been the object of much scrutiny. Yet, there is one dimension of his thought that remains unexamined by scholars: the presence of the ancient science of astrology in his writings. This book, the first of its kind, identifies the astrological elements and explains the implications of their usage by Agamben. In so doing, this study challenges us to imagine Agamben's thought in a radically new light. A critical account of the presence of astrology and related themes in Agamben's writings, ranging from the earlier works to the more recent publications, illustrates that the astrological signature constitutes a mode of philosophical archaeology that allows for an enhanced understanding of concepts that are central to his works, such as potentiality, the signature, bare life and biopolitics.
