*Materials Science and Engineering: Concepts, Methodologies, Tools, and Applications* Routledge

This handbook, which serves as a follow-up text to *The Palgrave Handbook of Experiential Learning In International Business*, reviews theoretical and empirical approaches of experiential learning pedagogy, and its role in increasing the effectiveness in teaching and learning of international business, and also, in the incorporation of international business-related concepts and competences in business and non-business programs. This edition offers a broader and updated perspective on experiential learning pedagogy for international business and management, and beyond. The first part provides an updated overview of the theories of experiential learning and effectiveness of teaching and learning in international business through the use of experiential learning projects. Part two provides a collection of specific applications of experiential learning in International Business and related fields. This handbook is a one-stop source for international managers,

business educators, and trainers seeking to either select and use an existing experiential learning project or develop new projects and exercises of this kind.

Underground pipelines transporting liquid petroleum products and natural gas are critical components of civil infrastructure, making corrosion prevention an essential part of asset-protection strategy. *Underground Pipeline Corrosion* provides a basic understanding of the problems associated with corrosion detection and mitigation, and of the state of the art in corrosion prevention.

The topics covered in part one include: basic principles for corrosion in underground pipelines, AC-induced corrosion of underground pipelines, significance of corrosion in onshore oil and gas pipelines, numerical simulations for cathodic protection of pipelines, and use of corrosion inhibitors in managing corrosion in underground pipelines. The methods described in part two for detecting corrosion in underground pipelines include: magnetic flux leakage, close interval potential surveys (CIS/CIPS), Pearson surveys, in-line inspection, and use of both electrochemical and optical probes. While the emphasis is on pipelines transporting fossil fuels, the concepts apply as well to metallic pipes for delivery of water and other liquids. *Underground Pipeline Corrosion* is a comprehensive resource for corrosion, materials, chemical, petroleum, and civil engineers constructing or managing both onshore and offshore pipeline assets; professionals in steel and coating companies; and academic researchers and professors with an interest in corrosion and pipeline engineering. Reviews the causes and considers the detection and prevention of corrosion to underground pipes Addresses a lack of current, readily available information on the subject Case studies demonstrate how corrosion is managed in the underground pipeline industry

Time is on your side—smart money management for Millennials *Smart is the New Rich: Money Guide for Millennials* is an interactive, step-by-step guide to all things money. From credit, student debt, savings, investing, taxes, and mortgages, CNN's chief business correspondent Christine Romans shows this newest generation of earners how to build wealth. You'll learn the old-fashioned approach that leads to a healthier financial lifestyle, and open the door on a straightforward conversation about earning, saving, spending, growing, and protecting your money. You'll learn how to invest in the stock market or buy a home, even if you are still paying off student loan debt. Romans offers expert insight on the "New Normal," and why the rules of the credit bubble—the one you were raised in—no longer apply. Checklists and quizzes help solidify your understanding, and pave the way for you to start putting these new skills into action. For thirty years, the financial rules for life revolved around abundant credit at the ready. A quick look around makes it obvious that those rules no longer work, and Millennials just now coming of age and entering the workforce need a new plan to build a solid financial foundation and healthy money habits. This book puts you on the right track, with step-by-step help and expert guidance. Learn what you should ask yourself before spending any money Revisit some old money rules that are actually good habits See simple rules for managing student debt Learn how to talk about money with friends, dates, and parents Find out what makes a Millennial

successful in the workforce. The economy is out of recession and growing, but many young people feel left out of the recovery. It's why smart spending, saving, and debt management is so critical right now for them. A smart money plan is no longer a "nice to have" extra, it's mandatory. **Smart is the New Rich: Money Guide for Millennials** is your guide on how to use time and some good money manners to build wealth.

**Flourishing in Emerging Adulthood** highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future? Matthew T. Hora and his colleagues explain that the answer is not simply that students need more specialized technical training to meet narrowly defined employment opportunities. Beyond the Skills Gap challenges this conception of the "skills gap," highlighting instead the value of broader twenty-first-century skills in postsecondary education. They advocate for a system in which employers share responsibility along with the education sector to serve the collective needs of the economy, society, and students. Drawing on interviews with educators in two- and four-year institutions and employers in the manufacturing and biotechnology sectors, the authors demonstrate the critical

importance of habits of mind such as problem solving, teamwork, and communication. They go on to show how faculty and program administrators can create active learning experiences that develop students' skills across a range of domains. The book includes in-depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty-first-century habits of mind. The study, set in Wisconsin, takes place against the backdrop of heated political debates over the role of public higher education. This thoughtful and nuanced account, enriched by keen observations of postsecondary instructional practice, promises to contribute new insights to the rich literature on workforce development and to provide valuable guidance for postsecondary faculty and administrators.

Looking to foster student leadership competency development? With this volume, you'll gain the latest research, resources, and tools to do just that. There are many factors to consider when providing educational experiences that foster student leadership competency development. But, the process of designing, facilitating,

and assessing these experiences to be both effective and meaningful can be elusive and challenging. In this volume, a variety of scholars offer diverse perspectives and nuanced expertise that address the following questions: What leadership competencies are the most critical for students to develop? How can we ensure students are ready to develop leadership competencies? What instructional strategies and program design elements can we use to effectively enhance leadership competency development? How do we help students and educators track and measure leadership competency learning and growth? The Jossey-Bass quarterly report series *New Directions for Student Leadership* explores leadership concepts and pedagogical topics of interest to high school and college leadership educators. Issues are grounded in scholarship and feature practical applications and best practices in youth and adult leadership education.

#### Flourishing in Emerging Adulthood Wiley

A practical how-to guide for students and a powerful reminder of the value of a humanities education. In recent decades, the humanities have struggled to justify themselves in the American university. The costs of attending a four-year college have exploded, resulting in intense pressure on students to major in STEM (science, technology, engineering, and mathematics), business, and other pre-professional or "practical" majors that supposedly transmit more marketable skills than can be acquired from the humanities. But, as Laurie Grobman and E. Michele Ramsey argue, this vision of humanities majors idly pondering the meaning of life for four years is inaccurate. *Major Decisions* demonstrates how choosing a major in the humanities is a worthwhile investment in a global economy that is shifting in the direction of college graduates who think broadly, critically, and ethically. Indeed, the core skills and knowledge imparted by an education in the humanities—including facility with written and verbal communication, collaboration, problem-solving, technological literacy, ethics, leadership, and an understanding of the human impacts of globalization—are immensely useful to employers across a variety of sectors. *Major Decisions* serves as a deeply informative guide to students and parents—and provides a powerful reminder to employers and university administrators of the true value of an education in the humanities.

The post-graduation outcomes of college students are being more widely used as key metrics to demonstrate institutional effectiveness to both external agencies and internal stakeholders. Institutional research offices play an

integral role in these data collection efforts. However, underlying challenges exist regarding obtaining an adequate amount of survey responses and salary or earnings information. This volume focuses on the first-destination outcomes (e.g., earnings, employment, graduate/ professional school enrollment) of college graduates while recognizing that other outcomes are also relevant across institutional settings. Through the use of current research, case studies, and best practices, each chapter highlights how postgraduate outcomes information is collected and used across the higher education spectrum. In this volume readers will learn: the internal and external demands for these data, the strengths and challenges of their data, and how to best communicate these data to various constituents. This is the 169th volume of this Jossey-Bass quarterly report series. Timely and comprehensive, *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.
