From some of our most prominent spiritual and religious leaders, poets and thinkers, singers and writers, a book of wisdom to light our way in dark times. At the start of 2020, in what felt already like an age of disorder, our world faced one of the gravest global challenges in a century. Covid-19 raced around the earth, and chaos erupted. Yet in the midst of this crisis, billions of human beings responded with love. Across the globe, people sought to connect, whether in person from a socially distant six feet or via a screen from 10,000 miles away. In that moment, Tim Shriver saw an opportunity for those hungry for community to answer a call to heal, a call to hope, a call to unite. He asked monks and nuns, artists and activists, nurses and doctors, ex-presidents and ex-cons to come together to share messages of inspiration,

transformation, and love. This book captures the spirit of that 24-hour event. Featuring stories and insights from Bishop TD Jakes, Elizabeth Gilbert, Van Jones, Amy Grant, Dr. Rheeda Walker, Pastor Rick Warren, Rev. Jacqui Lewis, Jewel, Deepak Chopra and many others, *The Call to Unite* offers readers a book of wisdom to turn to in hard times - filled with prayers, poems, spiritual insights and lessons to live by that will stand the test of time. Those seeking affirmation, solace, and inspiration need only look inside for guidance in finding the light in any crisis. Only in embracing each other can we amplify the love that creates our global community. Only in coming together can we be our happiest, and our best.

A dead man hangs from the portal of St Paul Chapel in Damascus. He was a Muslim officer and he was murdered. But when Detective Barudi sets out to interrogate the man's mysterious widow, the Secret Service takes the case away from him. Barudi continues to investigate clandestinely and discovers the murderer's motive: it is a blood feud between the Mushtak and Shahin clans, reaching back to the beginnings of the 20th century. And, linked to it, a love story that can have no happy ending, for reconciliation has no place within the old tribal structures. Rafik Schami's dazzling novel spans a century of Syrian history in which politics and religions continue to torment an entire people. Simultaneously, his poetic stories from three generations tell of the courage of lovers who risk death sooner than deny their passions. He has also written a heartfelt tribute to his hometown Damascus and a great and moving hymn to the power of love.

Running more than 1,200 miles from headwaters in eastern New Mexico through the middle of Texas to the Gulf of Mexico, the Brazos River has frustrated developers for nearly two centuries. This environmental history of the Brazos traces the techniques that engineers and politicians have repeatedly used to try to manage its flow. The vast majority of projects proposed or constructed in this watershed were failures, undone by the geology of the river as much as the cost of improvement. When developers erected locks, the river changed course. When they built large-scale dams, floodwaters overflowed the concrete rims. When they constructed levees, the soils collapsed. Yet lawmakers and laypeople, boosters and engineers continued to work toward improving the river and harnessing it for various uses. Through the plight of the Brazos River Archer illuminates the broader commentary on the efforts to tame this nation's rivers as well as its historical perspectives on development and technology. The struggle to overcome nature, Archer notes, reflects a quintessentially American faith in technology.

How do we get at the meanings of everyday (and not so everyday) objects, and how might these meanings enrich educational research? The study of objects is well established in fields such as archaeology, art history, communications, fine arts, museum studies, and sociology—but is still developing in education. *Object Medleys: Interpretive Possibilities for Educational Research* brings together 37 educational researchers from wide-ranging contexts and multiple knowledge fields to a dialogic space in which subjects and objects, living and nonliving, entangle as medleys to open up understandings of connections made with, between, and through objects. *Object Medleys* offers diverse, innovative modes and lenses for representing, interpreting, and theorising object studies. The book is distinctive within scholarship on object inquiry in that much of the research has been conducted within Southern African educational contexts. This is complemented by contributions from scholars based in Canada and the United Kingdom. The original research represented in each peer-reviewed chapter expands academic conversations about what counts as data and analysis in educational research. Overall, *Object Medleys* illuminates the applied and theoretical usefulness of objects in response to pressing educational and societal questions. "Object Medleys is a rich and fascinating exploration of new possibilities, with potential for research, teaching, and learning that seems almost unlimited. This book is a rich assembly of affordances for exploring and widening the

role of objects in educational research. It relocates attention from language and text towards embodied and material storytelling practices where new and marginalised ways of expression can find their ways into classrooms, thereby opening completely new avenues of teaching and learning." – Kenneth Mølberg Jørgensen, Professor, Aalborg University, Denmark "In a time when materiality is being brought at the centre of critical inquiry in the social sciences and humanities, this edited collection offers unique insights into the relationship between objects, subjectivities, and learning. Beautifully written and cogently argued, the book breaks new ground by casting a critical spotlight on artefacts that might appear mundane at first sight but, on closer inspection, reveal complex patterns of educational potential." – Tommaso M. Milani, Associate Professor, University of the Witwatersrand, Johannesburg, South Africa

"I'm mad as hell, and I'm not going to take it anymore!" The words of Howard Beale, the fictional anchorman in 1976's hit film *Network*, struck a chord with a generation of Americans. In this colourful new history, Dominic Sandbrook ranges seamlessly over the political, economic, and cultural high (and low) points of American life in the 1970s, exploring the roots of the fears, resentments, cravings, and disappointments we know so well today. From Richard Nixon and Ronald Reagan to Anita Bryant and Jerry Falwell, he shows how the 1970s saw the emergence of a new right-wing populism, setting the stage for the bitter partisanship and near-total cynicism of our modern political landscape.

Life -- personally and professionally -- is lived to the fullest as a mosaic, encompassing a rich and complex set of diverse experiences that provide purpose, meaning, happiness, and success. Yet, the pressures of modern society push us toward narrower focus and deeper specialization in our lives and careers. Our pursuit of specific expertise risks us becoming isolated from those different from us; our lack of shared experience fosters suspicion and conflict. Today we have businesspeople and government officials who persistently distrust and demonize each other; a fortunate swath of society with professional and financial security, increasingly isolated from those left behind; and community leaders who struggle to relate to and connect with the communities they serve. In every walk of life we have allowed ourselves to be pushed into self-defining cocoons from which it is difficult to break out. Nick Lovegrove's compelling vision provides the way out of this contemporary trap. He supplies vivid portraits of those who get it right (such as Paul Farmer, the physician whose broad and imaginative choices bring health and hope to the world's poorest people) and those who get it deeply wrong (such as Jeffrey Skilling, the former CEO of Enron) and connects their experiences with a blueprint of six skills -- a moral compass, transferrable skills, contextual intelligence, prepared mind, intellectual thread, and extended network. The Mosaic Principle will help you to succeed in an ever-changing, more complex, and diverse world, and build a more remarkable and fulfilling life.
