In God we trust, the rest we monitor . . . A former chief of India's external intelligence agency, the Research and Analysis Wing, deconstructs the shadowy world of spies, from the Cold War era to the age of global jihad, from surveillance states to psy-war and cyberwarfare, from gathering information to turning it into credible intelligence. Vikram Sood provides a panoramic view of the rarely understood profession of spying to serve a country's strategic and security interests. As a country's stature and reach grow, so do its intelligence needs. This is especially true for one like India that has ambitions of being a global player even as it remains embattled in its own neighbourhood. The Unending Game tackles these questions while providing a national and international perspective on gathering external intelligence, its relevance in securing and advancing national interests, and why intelligence is the first playground in the game of nations.

From 9/11 to Charlie Hebdo along with Sony-pocalypse and DARPA's \$2 million Cyber Grand Challenge, this book examines counterterrorism and cyber security history, strategies and technologies from a thought-provoking approach that encompasses personal experiences, investigative journalism, historical and current events, ideas from thought leaders and the make-believe of Hollywood such as 24, Homeland and The Americans. President Barack Obama also said in his 2015 State of the Union address, "We are making sure our government integrates intelligence to combat cyber threats, just as we have done to combat terrorism. In this new edition, there are seven completely new chapters, including three new contributed chapters by healthcare chief information security officer Ray Balut and Jean C. Stanford, DEF CON speaker Philip Polstra and security engineer and Black Hat speaker Darren Manners, as well as new commentaries by communications expert Andy Marken and DEF CON speaker Emily Peed. The book offers practical advice for businesses, governments and individuals to better secure the world and protect cyberspace.

Pointing to the horizon where the sea and sky are joined, he says, 'It is only an illusion because they can't really meet, but isn't it beautiful, this union which isn't really there.' -- SAADAT HASAN MANTO Sometime in 2016, a series of dialogues took place which set out to find a meeting ground, even if only an illusion, between A.S. Dulat and Asad Durrani. One was a former chief of RAW, India's external intelligence agency, the other of ISI, its Pakistani counterpart. As they could not meet in their home countries, the conversations, guided by journalist Aditya Sinha, took place in cities like Istanbul, Bangkok and Kathmandu.On the table were subjects that have long haunted South Asia, flashpoints that take lives regularly. It was in all ways a deep dive into the politics of the subcontinent, as seen through the eyes of two spymasters. Among the subjects: Kashmir, and a missed opportunity for peace; Hafiz Saeed and 26/11; Kulbhushan Jadhav; surgical strikes; the deal for Osama bin Laden; how the US and Russia feature in the India-Pakistan relationship; and how terror undermines the two countries' attempts at talks.When the project was first mooted, General Durrani laughed and said nobody would believe it even if it was written as fiction. At a time of fraught relations, this unlikely dialogue between two former spy chiefs from opposite sides--a project that is the first of its kind--may well provide some answers.

The cost of cyber crime to the UK is currently estimated to be between £ 18 billion and £ 27 billion. Business, government and the public must therefore be constantly alert to the level of risk if they are to succeed in detecting and resisting the threat of cyber attack. The UK Cyber Security Strategy, published in November 2011, set out how the Government planned to deliver the National Cyber Security Programme through to 2015, committing £ 650 million of additional funding. Among progress reported so far, the Serious Organised Crime Agency repatriated more than 2.3 million items of compromised card payment details to the financial sector in the UK and internationally since 2011, preventing a potential economic loss of more than £ 500 million. In the past year, moreover, the public reported to Action Fraud over 46,000 reports of cyber crime, amounting to £ 292 million worth of attempted fraud. NAO identifies six key challenges faced by the Government in implanting its cyber security strategy in a rapidly changing environment. These are the need to influence industry to protect and promote itself and UK plc; to address the UK's current and future ICT and cyber security skills gap; to increase awareness so that people are not the weakest link; to tackle cyber crime and enforce the law; to get government to be more agile and joined-up; and to demonstrate value for money. The NAO recognizes, however, that there are some particular challenges in establishing the value for money

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival.

Becausestudents who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. Theauthors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging,race/racism and health, mental health, and healers and healing.

“ Meticulously researched . . . This is the definitive chronicle of the Middle East crisis during the Clinton years and in the post-9/11 era ” (Publishers Weekly). “ Providing a fly-on-the-wall vantage of the rising diplomatic panic that sent shudders through world capitals, ” Kill Khalid unfolds as a masterpiece of investigative journalism (Toronto Star). In 1997, the Israeli intelligence agency Mossad poisoned Hamas leader Khalid Mishal in broad daylight on the streets of Amman, Jordan. As the little-known Palestinian leader slipped into a coma, the Mossad agents ’ escape was bungled and the episode quickly spiraled into a diplomatic crisis. A series of high-stakes negotiations followed, which ultimately saved Mishal and set the stage for his phenomenal political ascendancy. In Kill Khalid, acclaimed reporter Paul McGeough reconstructs the history of Hamas through exclusive interviews with key players across the Middle East and in Washington, including unprecedented access to Mishal himself, who remains to this day one of the most powerful and enigmatic figures in the region. A “ sobering reminder of how little has been achieved during 60 years of Israeli efforts in Palestine, ” Kill Khalid tracks Hamas ’ s political fortunes across a decade of suicide bombings, political infighting, and increasing public support, culminating in the battle for Gaza in 2007 and the current-day political stalemate (Kirkus Reviews, starred review). “ A pacey, riveting, and controversial book that has all the compulsion of a Le Carr é novel. ” —John F. Burns, The New York Times “ [A] gem of leave-no-stone-unturned reporting. ” —Foreign Affairs

The first time the Mossad came calling, they wanted Victor Ostrovsky for their assassination unit, the kidon. He turned them down. The next time, he agreed to enter the grueling three-year training program to become a katsa, or intelligence case officer, for the legendary Israeli spy organization. By Way of Deception is the explosive chronicle of his experiences in the Mossad, and of two decades of their frightening and often ruthless covert activities around the world. Penetrating far deeper than the bestselling Every Spy a Prince, it is an insider's account of Mossad tactics and exploits. In chilling detail, Ostrovsky asserts that the Mossad refused to share critical knowledge of a planned suicide mission in Beirut, leading to the death of hundreds of U.S. Marines and French troops. He tells how they tracked Yasser Arafat by recruiting his driver and bodyguard; how they withheld information on the whereabouts of American hostages, paving the way for the Iran-Contra scandal; and how their intervention into secret UN negotiations led to the sudden resignation of ambassador Andrew Young and the downfall of his career. By Way of Deception describes the shocking scope and depth of the Mossad's influence, disclosing how Jewish communities in the U.S., Europe, and South America are armed and trained by the organization in secret ?self-defense? units, and how Mossad agents facilitate the drug trade in order to pay the enormous costs of its far-flung, clandestine operation. And it

portrays a network that has grown dangerously out of control, as internal squabbles have led to the escape of terrorists and the pursuit of ?policies? completely at odds with the interests of the state of Israel. This document is possibly the most important and controversial book of its kind since Spycatcher.

This study presents an analysis of US-Iranian relations in the twentieth century, with particular attention to the crisis over nationalization of British oil interests at midcentury. As such, it focuses on the career of Muhammad Musaddiq, who struggled during those years to free his country from foreign influence, and whose memory continued to haunt bilateral relations with the United States up to the Iranian revolution. Throughout, it examines Anglo-American views of Iranians (and by implication of other non-Westerners) which affected - and still affect - the conduct of international relations.

This is one of the many inspiring books from the renowned “ Motivator ” Dr. G. Francis Xavier. Evidently, this harvest of stories has been gleaned from lands he visited and books he read. Xavier, who conducts full-house personal growth courses has brought out this compendium in an interactive form, making the reader give the answers at the end of the story, which is a novel approach. Stories and examples are the best way to inspire, and this volume can be gifted to anyone. It is useful for preachers, speakers and teachers. The book appeals to readers of all ages except the morose and irredeemable negaholics (negative thinking addicts) and anti-reading teenagers. It has stories to inspire and promises uninterrupted chuckles till the end. There are also quotations on success.
