This publication isn't intended to cover bankruptcy law in general, or to provide detailed discussions of

the tax rules for the more complex corporate bankruptcy reorganizations or other highly technical transactions. Additionally, this publication isn't updated on an annual basis and may not reflect recent developments in bankruptcy or tax law. If you need more guidance on the bankruptcy or tax laws applicable to your case, you should seek professional advice. This publication explains the basic federal income tax aspects of bankruptcy. A fundamental goal of the bankruptcy laws enacted by Congress is to give an honest debtor a financial "fresh start". This is accomplished through the bankruptcy discharge, which is a permanent injunction (court-ordered

prohibition) against the collection of certain debts as a personal liability of the debtor. Bankruptcy proceedings begin with the filing of either a voluntary petition in the United States Bankruptcy Court, or in certain cases an involuntary petition filed by creditors.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and

promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and

accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
