—Steven D. Levitt, coauthor of *Freakonomics* "Bursting with insights." —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest,

greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, *The Virtual Community* is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's

population is wired. It also contains an extended bibliography.

Today's established companies must find new ways to reignite their entrepreneurial DNA and jumpstart revenues--or risk losing their way. By working with startup companies, Jim Stengel, renowned consultant to Fortune 500 companies and the former global marketing officer for Procter & Gamble, says that legacy companies can renew themselves: by acquiring new technology and creating new business lines; relearning the need for speed; sparking innovation; and learning from failures. At P&G, Stengel saw the importance of establishing partnerships with the startup world in order to learn how to better innovate. Relying on extensive interviews with

---

innovation leaders at enterprise companies and startups, Stengel ' s Unleashing the Innovators takes readers inside such storied companies as GE and Wells Fargo, IBM and Target, Motorola Solutions and Toyota to see what they are learning from their alliances with entrepreneurs. Stengel also explores how even 20- and 30-year-old "startups" like Amazon, Google, and Facebook can reinvent themselves--and what managers at legacy companies everywhere can learn from them. Drawing on a specially commissioned global study of over 200 established corporations and startups, conducted by research consultancy OgilvyRED, Stengel found that companies with successful startup partnerships are three times more likely to change their culture to be more innovative. Filled with indepth stories from the front lines of today ' s most forward-looking companies, Unleashing the

Innovators shows how companies of all sizes can better navigate today ' s changing landscape, accelerate innovation, increase revenues, and improve their customer relationships.

The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is

---

slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

The ultimate reference for Triumph lovers and fans of British motorcycles, *The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today* collects all of the motorcycles from this iconic brand in a

---

single illustrated volume. In this revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs through 2019. Originally formed as a bicycle company in 1885, Triumph produced its first motorcycle in 1902, which was simply a bicycle fitted with a Belgian Minerva engine. From there, the company, in various iterations, went on to build some of the most iconic motorcycles of all time. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and

Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives. The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. This is a book no Triumph fan should be without!

Most parking research to date has been conducted in Western countries. Parking: An International Perspective is different. Taking a planetary view of urbanism, this book examines parking policies in 12 cities on five continents: Auckland, Bangkok,

---

Doha, Los Angeles, Melbourne, Nairobi, Rotterdam, Santiago, Sao Paulo, Shenzhen, Singapore, and Tokyo. Chapters are similarly structured, and contain detailed information about the current parking strategies and issues in these cities. The discussion of parking is placed in the context of transport, mobility, land-use, society, technology, and planning in each of these cities. Features structured case studies focused on summarizing current and emerging trends in parking policy and practice in cities around the world. Provides a systematic comparison of parking issues and approaches across a variety of situational and cultural contexts - examining each city's transport modes, social trends, land use, technology and planning policies. Offers a bridge between transport planning research and practice related to the latest trends in parking and parking space re-use.

In recent decades, gold mining has moved into increasingly remote corners of the globe. Aside from the expansion of industrial gold mining, many countries have simultaneously witnessed an expansion of labor-intensive and predominantly informal artisanal and small-scale gold mining. Both trends are usually studied in isolation, which contributes to a dominant image of a dual gold mining economy.

---

Counteracting this dominant view, this volume adopts a global perspective, and demonstrates that both industrial gold mining and artisanal and small-scale gold mining are functionally integrated into a global gold production system. It couples an analysis of structural trends in global gold production (expansion, informalization, and technological innovation) to twelve country case studies that detail how global gold production becomes embedded in institutional and ecological structures.

The only fully comprehensive guide to "all things feline," from the host of Cat Chat on Martha Stewart Living Radio. Finally, a definitive book that delivers many unknown facts about every aspect of caring for and sharing your life with

a cat, ranging from proper nutrition and strange behavior to medical care and multi-cat households, to grooming and geriatrics. The Cat Bible explains the mysteries of feline behavior to owners who are devoted to their cats without being able to fully understand them. It offers straightforward solutions to the problems that cause people to give up their cats, many of which are preventable, including litter box avoidance, furniture scratching, and physical ailments. There are more than 90 million American households that count cats as family members, but they are a vastly underserved population, devoted to their kitties, yet bereft of all the public attention, programming, and print devoted to dogs. Now, bestselling author and investigative journalist Tracie
