There are today no more compelling sets of crime and security threats facing nations, communities, organizations, groups, families and individuals than those encompassed by cybercrime. For over fifty years crime enabled by computing and telecommunications technologies have increasingly threatened societies as they have become reliant on information systems for sustaining modernized living. Cybercrime is not a new phenomenon, rather an evolving one with respect to adoption of information technology (IT) for abusive and criminal purposes.

Further, by virtue of the myriad ways in which IT is abused, it represents a technological shift in the nature of crime rather than a new form of criminal behavior. In other words, the nature of crime and its impacts on society are changing to the extent computers and other forms of IT are used for illicit purposes. Understanding the subject, then, is imperative to combatting it and to addressing it at various levels. This work is the first comprehensive encyclopedia to address cybercrime. Topical articles address all key areas of concern and specifically those having to with: terminology, definitions and social constructs of crime; national infrastructure security vulnerabilities and capabilities; types of attacks to computers and information systems; computer abusers and cybercriminals; criminological, sociological, psychological and technological theoretical underpinnings of cybercrime; social and economic impacts of crime enabled with information technology (IT) inclusive of harms experienced by victims of cybercrimes and computer abuse; emerging and controversial issues such as online pornography, the computer hacking subculture and potential negative effects of

electronic gaming and so-called computer addiction; bodies and specific examples of U.S. federal laws and regulations that help to prevent cybercrimes; examples and perspectives of law enforcement, regulatory and professional member associations concerned about cybercrime and its impacts; and computer forensics as well as general investigation/prosecution of high tech crimes and attendant challenges within the United States and internationally.

Interview Questions In C Programming Dorling Kindersley Ltd As most of you are aware, the road to a successful career in Software starts with a series of Written Technical Tests conducted by most IT companies in India. These companies test you fundamental skills in programming and design in three major areas- C Programming, Data Structures and C++ Programming. Most of you may have prepared for that "dream test" without knowing the exact pattern, the level and the difficulty of questions that appear in such tests. As a result, you are not able to give your best performance in these tests. This "Interview Questions" series addresses these concerns and is aimed at giving you the necessary practice and confidence to help you crack these tests. This series presents a whole gamut on questions on different topics in each of these three subjects- C. DS and C++. This volume is dedicated to topics like : Contents Data types Operators Pointers Advanced Storage Classes Arrays Structures Control Instructions Functions Pointer Concepts Preprocessor Directives Strings Unions

MicroRNAs are small non-coding RNAs involved in post-transcriptional regulation of gene expression. Thousands of miRNAs have been identified in different organisms including viruses, insects, plants and animals. MiRNAs has emerged as key regulators of important biological processes. The differential expression of miRNAs in various human diseases has made them potential candidates for developing novel therapies and personalized medicines. This book is focused on microRNA let-7, the second miRNA discovered in the year 2000 and one of the most studied miRNA. This book discusses various aspects of miRNA let-7 starting from its discovery, biogenesis, transcriptional and posttranscriptional regulation to its crucial role in various fundamental cellular processes such as development, stem cell maintenance and differentiation, regulation of signalling pathways in cancer, drug resistance and therapeutic potential in different human diseases.

divThe Internet has changed our social spaces, our political and social realities, our use of language, and the way we communicate, all with breathtaking speed. Almost everyone who deals with the Internet and the new world of cyberspace communication at times feels bewildered, dismayed, or even infuriated. In this clear and helpful book, computer communications scholar Laura J. Gurak takes a close look at the critical issues of online communication and discusses how to become literate in the new mass medium of our era. In cyberspace, Gurak shows us, literacy means much more than knowing how to read. Cyberliteracy means being able to sort fact from fiction, to detect extremism from reasonable debate, and to identify gender bias, commercialism, imitation, parody, and other aspects of written language that are problematic in online communication. Active reading skills are essential in cyberspace, where hoaxes abound, advertising masquerades as product information, privacy is often compromised, and web pages and e-mail messages distort the truth. Gurak analyzes the new language of the Internet, explaining how to prepare for its discourse and protect oneself from its hazards. This book will appeal to anyone with an interest in the impact of the Internet on the practices of reading and writing and on our culture in general./DIV

The Zen of Fish CRC Press
Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an

active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

While egg-sitting for his friend Kack Kack the duck, Bently Hopperton the frog is so bored that he cannot resist painting the egg's shell. But when the decorated egg is mistaken for an Easter egg and is egg-napped, Bently discovers that he has in fact, grown terrifically fond of that ole egg. Can he rescue the egg before it's too late? An homage to fatherhood, and the

appreciation of swell art.

The Packet Radio Handbook Simon and Schuster Stark is a secret consortium with more money than God, and the social conscience of a dog on a croquet lawn. What's more, it knows the Earth is dying. Deep in Western Australia where the Aboriginals used to milk the trees, a planet-sized plot is taking shape. Some green freaks pick up the scent: a pommie poseur; a brain-fried Vietnam vet; Aboriginals who have lost their land...not much against a conspiracy that controls society. But EcoAction isn't in society: it just lives in the same place, along with the cockroaches. If you're facing the richest and most disgusting scheme in history, you have to do more than stick up two fingers and say 'peace'.
