After World War II, the United States underwent a massive cultural transformation that was vividly realized in the development and widespread use of new medical technologies. Plastic surgery, wonder drugs, artificial organs, and prosthetics inspired Americans to believe in a new age of modern medical miracles. The nationalistic pride that flourished in postwar society, meanwhile, encouraged many Americans to put tremendous faith in the power of medicine to rehabilitate and otherwise transform the lives and bodies of the disabled and those considered abnormal. Replaceable You revisits this heady era in American history to consider how these medical technologies and procedures were used to advance the politics of conformity during the 1950s.

Kate Braverman grew up in Los Angeles in the late 1950s at the time when glitz was just beginning to be manufactured. Her Los Angeles was made up of stucco tenements, welfare, and the marginalized. It wasn't a destination city, it was the end of the line. Frantic Transmissions to and from Los Angeles chronicles the trajectory of Braverman's Left Coast generation with a voice of singular power. She was an antiwar activist in Berkeley, a punk-rock poet on Sunset Strip, a single mother in the East L.A. barrio, and a woman in recovery at AA meetings in Beverly Hills. By 1990 she was married and settled into a life of writing and teaching. In her forties, Braverman did the unthinkable and moved from Beverly Hills to New York's Allegheny Mountains to a 150-year-old farmhouse. In wide-ranging transmissions, Braverman deftly contrasts the social histories of Los Angeles with her new, timeless rural community; describes the effects of the changing seasons on her Californian, sun-drenched soul; and marvels at how a remote farmhouse can offer surprising consolations. Library Journal calls Braverman a "literary genius"; Rolling Stone describes her as having the "power and intensity you don't see much outside of rock and roll." Frantic Transmissions to and from Los Angeles offers an eccentric and insightful view of social and individual transformation.

In recent years, the fabrication of nanoparticles and exploration of their properties have attracted the attention of physicists, chemists, biologists and engineers. Interest in nanoparticles arise from the fact that the mechanical, chemical, electrical, optical, magnetic, electro-optical and magneto-optical properties of these particles are different from their bulk properties and depend on the particle size. There are numerous areas where nanoparticulate systems are of scientific and technological interest. "Jacob (Yock) Bauman, a young member of an Amish community near Kitchener, Ontario, chafes at the strict (and, he believes, outmoded) beliefs of his elders, particularly those of his father, Christy. World War I is raging in Europe, and most of Canada's young men have gone off to fight with the British forces, but the Amish, because of their pacifist convictions, have refused to join the war effort. By deciding to enlist, Yock alienates himself not only from family and community, but also from the lovely Katie Brubacher, with whom he has fallen in love. When Yock returns from the war Katie has wed someone else and, ironically, the very acts of bravery which have made him a hero to the rest of Canada have made Yock a bloody-handed villain to his own people. Although the compassionate Katie offers to leave her husband and go off with him, Yock accepts his status as an outcast and departs alone, but not before admitting that, while standing over the body of a slain German soldier, the meaning of pacifism was, at last, powerfully revealed to him. In the end, Yock's stern father (now a bishop) is vindicated--but at the loss of the one he sought to save, his beloved and only son!"--Playdatabase.com
