The Most Comprehensive Gunsmithing Guide of All Time. Written by one of the most prolific firearms experts of all time, The Complete Guide to Gunsmithing is a highly detailed and essential reference for the gun enthusiast and gunsmith alike. At nearly 500 pages, Chapel covers everything from the use of proper tools to how to get a gunsmithing job, and everything in between. In more than forty chapters of exceptionally clear prose, the book answers every question a collector, soldier, or home defender could have on topics such as: • Drawings and Blueprints • Stock Design •

Checkering and Carving • Stock Repairs and Alterations • Etching and Engraving • And many more Not only is the book an incredible resource for gun owners and gunsmiths, it's also a wonderful look at the world of firearms in the first half the twentieth century. Published just over seventy years ago, the book--and revised by the author two decades later—The Complete Guide to Gunsmithing is a fascinating look at how the nature of firearms has changed. With a thoughtful introductory note by renowned outdoorsman Dr. Jim Casada and eighty-five meticulous illustrations, this is the definitive edition of an enduring and authoritative classic. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home. The Suppressor Handbook McGraw Hill Professional

Peter Cappelli confronts the myth of the skills gap and provides an actionable path forward to put people back to work. Even in a time of perilously high unemployment, companies contend that they cannot find the employees they need.

Pointing to a skills gap, employers argue applicants are simply not qualified; schools aren't preparing students for jobs; the government isn't letting in enough high-skill immigrants; and even when the match is right, prospective

employees won't accept jobs at the wages offered. In this powerful and fast-reading book, Peter Cappelli, Wharton management professor and director of Wharton's Center for Human Resources, debunks the arguments and exposes the real reasons good people can't get hired. Drawing on jobs data, anecdotes from all sides of the employer-employee divide, and interviews with jobs professionals, he explores the paradoxical forces bearing down on the American workplace and lays out solutions that can help us break through what has become a crippling employer-employee stand-off. Among the questions he confronts: Is there really a skills gap? To what extent is the hiring process being held hostage by automated software that can crunch thousands of applications an hour? What kind of training could best bridge the gap between employer expectations and applicant realities, and who should foot the bill for it? Are schools really at fault? Named one of HR Magazine's Top 20 Most Influential Thinkers of 2011, Cappelli not only

changes the way we think about hiring but points the way forward to revitalize America's job engine again.

This Symposium is the third of a series of scientific meetings in the field of echocardiology, held at the Erasmus University Rotterdam. *

The series was initiated by Klaas Born, who organized the first two meetings with great success. These followed the procedure of two days of parallel sessions with invited speakers only. This time, we decided to broaden the basis of the meeting and have a three-day program of parallel sessions, combining invited papers, free communications and posters. We decided, however, to maintain one of the most striking features of the last meeting- having the complete proceedings available at the time of the meeting. We confronted the authors-to-be with a very tight schedule in order to make the book a true reflection of the state of the art in echocardiology. As a result, editing time was also very limited and

neither terminology nor units have been completely standardized. This book has three main parts. The first, and largest, part consists of contributions on echocardiology in adults, and is divided into four sections. The first section is a general survey of various applications, whereas the remaining three centre round specific applications, i.e. ischemic disease, left ventricular function and cardiac valves, respectively. The second part contains applications in pediatric cardiology; due to the wide variety of topics covered, no particular subdivision has been made. The last part of the book is devoted to instrumentation, methods and new developments.
