From the early 1900s through the 1950s, the postcard was an extraordinarily popular means of communication, and many of the postcards produced during this "golden age" can today be considered works of art. Postcard photographers traveled the length and breadth of the nation snapping photographs of busy street scenes, documenting local landmarks, and assembling crowds of local children only too happy to pose for a picture. These images, printed as postcards and sold in general stores across the country, survive as telling reminders of an important era in America's history. This fascinating new history of Ocean City, New Jersey, showcases more than two

hundred of the best vintage postcards available. Images in this collection date between 1879 and 1950.

"If it is beyond your power to control, let it go." "Do not wish that all things will go well with you, but that you will go well with all things." "In this way, you will overcome life's challenges, rather than be overcome by them." Epictetus (c. AD 50-135) was a former Roman slave who became a great teacher, deeply influencing the future emperor Marcus Aurelius among many others. His philosophy, Stoicism, was practical, not theoretical--aimed at relieving human suffering here and now. Epictetus knew suffering--besides being enslaved, he was lame in one leg and walked with a crutch. The Manual is a collection of Epictetus' essential teachings and pithy sayings, compiled by one of his students. It is the most accessible and actionable guide to Stoic philosophy, as relevant today as it was in the Roman Empire. This new edition, published by Ancient Renewal, is rendered in contemporary English by Sam Torode.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the

trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. UK photographer Stephen Gill has again used his surroundings as the inspiration for this beautiful and evocative series. "Hackney Flowers" evolved from Gill's longstanding interest in Hackney, East London. For this volume, Gill collected flowers, seeds, berries and objects from Hackney, then pressed them in his studio and rephotographed them alongside his own photographs and other found ephemera, thus building up multi-layered images built from the area. Some of the base photographs were also buried in Hackney Wick, allowing the subsequent decay to imprint upon the images, stressing this collaboration with place. A parallel series also runs within this finely produced book, showing members of the Hackney public with floral details on their persons. This is a warm, poetic and visually exciting book containing images that leave an overwhelming sense of color, emotion and rhythm extracted from a single borough of London.
