A healer with her own demons falls for a vampire who could save her soul or condemn it to hell. Loti Dupree has lost everything that ever mattered to her. Her sense of direction, her purpose, and the love of her life. She has no idea how she's going to go on without David . . . or that she's the last of an ancient lineage of healers thought to be extinct. But 500-year-old vampire Wolf Arrighi does. Wolf has been living outside the boundaries of his own kind for centuries, avoiding the vampire world with all its egotistical pleasures and exquisite pain. And for centuries, he's been seeking her, racked with a craving only she can satisfy. But when their worlds finally collide, their passion ignites an entirely new and entirely dangerous elemental magic, attracting an ancient evil hell-bent on possessing Loti for his own selfish desires. As one by one, the people she loves become casualties in the monster's dangerous games, Loti is forced to choose between saving them all or saving the one who saved her. Lummis introduces readers to a dark and seductive world full of vampires, witches, and ancient healers. If you love Laurell K. Hamilton and the bite of True Blood, you will devour this series! Attuned to a world of natural signs—the stars, the winds, the curl of ocean swells—Polynesian explorers navigated for thousands of miles without charts or instruments. They sailed against prevailing winds and currents aboard powerful double canoes to settle the vast Pacific Ocean. And they did this when Greek mariners still hugged the coast of an inland sea, and Europe was populated by stone-age farmers. Yet by the turn of the twentieth century, this story had been lost and Polynesians had become an oppressed minority in their own land. Then, in 1975, a replica of an ancient Hawaiian canoe—H?k?le'a—was launched to sail the ancient star paths, and help Hawaiians reclaim pride in the accomplishments of their ancestors. Hawaiki Rising tells this story in the words of the men and women who created and sailed aboard H?k?le'a. They speak of growing up at a time when their Hawaiian culture was in danger of extinction; of their vision of sailing ancestral sea-routes; and of the heartbreaking loss of Eddie Aikau in a courageous effort to save his crewmates when H?k?le'a capsized in a raging storm. We join a young Hawaiian, Nainoa Thompson, as he rediscovers the ancient star signs that guided his ancestors, navigates H?k?le'a to Tahiti, and becomes the first Hawaiian to find distant landfall without charts or instruments in a thousand years. Hawaiki Rising is the saga of an astonishing revival of indigenous culture by voyagers who took hold of the old story and sailed deep into their ancestral past.

A leading reporter offers a tour of military working dogs' extraordinary training, heroic accomplishments, and the lasting impacts they have on those who work with them. People all over the world have been riveted by the story of Cairo, the Belgian Malinois who was a part of the Navy SEAL team that led the raid on Osama bin Laden's compound. A dog's natural intelligence, physical abilities, and pure loyalty contribute more to our military efforts than ever before. You don't have to be a dog lover to be fascinated by the idea that a dog—the cousin of that furry guy begging for scraps under your table—could be one of the heroes who helped execute the most vital and high-tech military mission of the new millennium. Now Maria Goodavage, editor and featured writer for one of the world's most widely read dog blogs, tells heartwarming stories of modern soldier dogs and the amazing bonds that develop between them and their handlers. Beyond tales of

training, operations, retirement, and adoption into the families of fallen soldiers, Goodavage talks to leading dog-cognition experts about why dogs like nothing more than to be on a mission with a handler they trust, no matter how deadly the IEDs they are sniffing, nor how far they must parachute or rappel from aircraft into enemy territory. "Military working dogs live for love and praise from their handlers," says Ron Aiello, president of the United States War Dogs Association and a former marine scout dog handler. "The work is all a big game, and then they get that pet, that praise. They would do anything for their handler." This is an unprecedented window into the world of these adventurous, loving warriors.

Physical Sciences for NGSS has been specifically written to meet the requirements of the Next Generation Science Standards (NGSS) for High School Physical Sciences (HS-PS). It encompasses

all three dimensions of the standards (science and engineering practices, crosscutting concepts, and disciplinary core ideas), addressing the program content through a wide range of engaging student-focused activities and investigations. Through completion of these activities, students build a sound understanding of science and engineering practices, recognize and understand the concepts that link all domains of science, and build the knowledge base required to integrate the three dimensions of the standards to meet the program's performance expectations.

Whether solving biblical foreskin mysteries, having his head split open by a crowbar-wielding man named Thor or getting busted for pickpocketing in a remote Mexican desert, Ryan Moehring reveals in his debut collection of stories and essays, *The Fried Twinkie Manifesto*, that his irreverent wit and capacity for uncovering nuggets of insight from the rubble of the mundane make him one of humor's most promising newcomers. While maintaining a voice unmistakably his own, Moehring evokes the wild imagination of Tom Robbins, the soul of Sedaris, and the wisdom of Vonnegut. Though readers will more often than not find themselves laughing out loud, Moehring's eye for the profound and his unyielding honesty ensure that they are just as likely to cry—or cringe.

Through the voice of Mee Ali, readers experience the rhythms and rituals of life in rural Namibia in interconnected stories. In Oshaantu, a place where women are the backbone of the home but are expected to submit to patriarchal dominance, Mee Ali is happily married. Her friend, Kauna, however, suffers at the hands of an abusive husband. When he is found dead at home, many of the villagers suspect her of poisoning him. Backtracking from that time, the novel, with its universal appeal, reveals the value of friendships, some of which are based on tradition while others grow out of strength of character, respect, and love.

Every year, in the United States and the third world combined, 13.3 million boys and 2 million girls are circumcised. Whether because of perceived medical, cultural, or religious necessity, most of these parents feel they have no alternative but to allow their children to undergo this surgery. Sparking intense debate, the circumcision of children is a highly controversial and complex phenomenon that touches a variety of sociological areas, such as religious beliefs, identity issues, medical conceptualizations, fear, and superstition. The contributors to this volume comprise an international panel of experts in the fields of medicine, psychology, law, ethics, sociology, anthropology, history, theology, and politics. In 18 chapters they discuss the history of circumcision; document the physical and psychological consequences of circumcision; present the latest anatomical discoveries about the male prepuce; analyze the role of circumcision in various traditions; reveal the medical industry's investment in the practice; describe current legislative efforts to protect children from circumcision; and outline effective, culturally sensitive methods that are being implemented today to safeguard the human rights of at-risk children. For its insights into this troubling aspect of culture, *Understanding Circumcision: A Multi-Disciplinary Approach to a Multi-Dimensional Problem* is a critically important contribution to the growing body of literature on this subject.
