The Status of Student Involvement in University

Governance in Kenya Emerald Group Publishing
Transdisciplinary Research (TR) is an emerging field in the knowledge society for relating science and policy in addressing issues such as new technologies, migration, and public health. This

handbook provides a structured overview of the manifold experiences gained in these fields. In the first part, 21 projects from all over the world present their research approaches. In the second part, cross-cutting challenges of TR are discussed in reference to the same projects.

Behavioral Conformity of Undergraduate Students in Kenya. Which factors are determining behavioral change? African Books Collective

This book examines the concept of the democratization of governance in universities in

Kenya with particular emphasis on students involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University (representing the public sector) and the United States International University (representing the private sector). The guiding argument for the study was that shared

governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle, Kenyan universities have embraced democratic governance in which all stakeholders, including students, have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students, who are major stakeholders in

university education, are largely excluded from significant structures of governance thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs (unions, associations and/or councils), their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active

involvement in decision making is mainly confined to lower levels such as the school/faculty and departmental/programme. The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya. *Enterprise and Economic Development in Africa* IGI Global
Online learning has been

touted as one way of reducing the cost of higher education while simultaneously addressing the increasing demand for educational opportunity and providing access to hitherto “left out” populations. Many universities are defying tradition by offering completely online degrees for global participants. As such, research is needed to improve the design of online and virtual learning environments to ensure that they are inclusive and culturally adaptive for the global education

marketplace. The Handbook of Research on Cross-Cultural Online Learning in Higher Education shares paradigms, perspectives, insights, challenges, and best practices for the instructional design and delivery of cross-cultural adult web-based learning experiences and examines adult learner characteristics and competencies critical for the design of these applications. The content within this publication covers trending topics including virtual learning, culturally adaptive environments, and

online education and is intended for instructional designers, faculty, administrators, students, and researchers. Africa and the Kenyan Experience IGI Global An account of the author's ascent of Mount Kenya in 1899. Mackinder led a caravan of 176 persons to the summit of the higher of the two peaks. Despite an agreement with William Heinemann, the account has not been published

until now. This volume includes additional notes by an English geographer.

Laikipia-Mount Kenya Papers Deaf Education Beyond the Western WorldContext, Challenges, and Prospects

As teaching strategies continue to change and evolve, and technology use in classrooms continues to increase, it is imperative that their impact on student learning is monitored and assessed. New practices

are being developed to enhance students' participation, especially in their own assessment, be it through peer-review, reflective assessment, the introduction of new technologies, or other novel solutions. Educators must remain up-to-date on the latest methods of evaluation and performance measurement techniques to ensure that their students excel. Learning and Performance Assessment: Concepts, Methodologies, Tools, and

Applications is a vital reference source that examines emerging perspectives on the theoretical and practical aspects of learning and performance-based assessment techniques and applications within educational settings. Highlighting a range of topics such as learning outcomes, assessment design, and peer assessment, this multi-volume book is ideally designed for educators, administrative officials, principals, deans,

instructional designers, school boards, academicians, researchers, and education students seeking coverage on an educator ' s role in evaluation design and analyses of evaluation methods and outcomes. Issues of Participation and Knowledge Management GRIN Verlag
Security is a key topic of our time. But how do we understand it? Do law and religion take different views of it? In this fifth

volume in the Law and Religion in Africa series, radicalisation, terrorism, blasphemy, hate speech, religious freedom and just war theories rub shoulders with issues of witchcraft, female genital mutilation circumcision, child marriage, displaced communities and additional issues besides. This unique collection of topics is both challenging and inspiring, providing illumination in troubled times, and forming a sound foundation for future scholarship.

Educating for Durable Solutions Bloomsbury Publishing
Innovation has become a buzzword that promises dramatic changes in almost every field of business. Absent from this attention is a serious discussion of the ethical sides of dramatic change. To address this, editors Georges Enderle and Patrick E. Murphy gather a team of experts to fully

examine the ethics of innovation within business and the economy in this standout addition to the Studies in TransAtlantic Business Ethics series. CODESRIA What is education for an unknowable future? In *Educating for Durable Solutions*, Christine Monaghan explores how refugees and policymakers have answered this question over time by reconstructing the contemporary history of education in Kenya's Dadaab and Kakuma refugee camps. Through oral histories and archival research, Monaghan shows how, since the founding of both camps in 1991, refugees and policymakers have conceptualized, developed, implemented and changed refugee education programs. She also shows why and how, despite these changes, real challenges and persist in refugee education in Dadaab, Kakuma, and other camps throughout the world; these include high numbers of out-of-school children and youth, high student to teacher ratios, unpredictable funding, and persistent questions regarding what refugee education is for. The author shifts focus from debates over the impacts of specific policies and programs and explores instead

how and why different policies and programs were implemented whether they led to meaningful changes in the long-standing challenges of refugee education. She finds that when and where real changes occurred, individuals or small groups of refugees and policymakers acted with tremendous agency and as tireless advocates. As the Internet has evolved to become an integral part of modern society, the need for better quality assurance practices in web engineering has heightened. Adherence to and improvement of current standards ensures that overall web usability and accessibility are at optimum efficiency. Design Solutions for Improving Website

Quality and Effectiveness is an authoritative reference source for the latest breakthroughs, techniques, and research-based solutions for the overall improvement of the web designing process. Featuring relevant coverage on the analytics, metrics, usage, and security aspects of web environments, this publication is ideally designed for reference

use by engineers, researchers, graduate students, and web designers interested in the enhancement of various types of websites.

Handbook of Transdisciplinary Research Springer Focusing on global value chains and their importance to trade, this edited collection explores the strategic role of logistics and supply chain infrastructure in the

development of Africa. Skilled authors present critical analysis of the current state of logistics in Africa, and suggest improvements to policy and practice which address the issue of poor trading relationships. This book will engage entrepreneurs, academics and policy-makers interested in international business, raising awareness of the need for better trade infrastructure in

Africa in order to ensure the continent ' s economic development. Their impact on Kenya` s security standards, educational system and agricultural sector IGI Global

Most of the papers reproduced here have either been presented at a national or international conference, and some have been published elsewhere. I have obtained permission to republish because I think it is important to have them all together. The idea came to me when I was asked, during an interview, why I

wrote on such different topics as part of my scholarship. The question was based on the different publications in which the person asking had found them. I had to explain that they are all on language and culture, two areas that are closely interrelated. It occurred to me that having all the papers published in one volume would help show how they relate to one another, and thereby provide a more meaningful dialogue on the general topic. I therefore hope that although each paper stands alone, use of cross-referencing will provide a

cumulative effect that is impossible when the papers are read as separate publications. The last chapter is not a paper in the traditional sense, in that it is just a list of words. However, it adds to the readers understanding of the Kikuyu language. The semantic domains are a people groups way of understanding, categorizing and labeling the world around them. I hope it will be especially important as a source for future scholars who will want to analyze the culture and thought processes of their ancestors.

Handbook of Research on Cross-Cultural Online Learning in Higher Education Springer
As today ' s teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but only “ how? ” Forced to combat shorter attention spans and an excess of stimuli, teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The Handbook of Research on Educational Technology Integration and

Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential reference source for educators, academics, students, researchers, and librarians.

Enterprise resource planning (ERP) is a class of integrated software that uses software technologies to implement real-time management of business processes in

an organization. ERPs normally cut across organizations, making them large and complex. Software researchers have for many years established that complexity affects software quality negatively and must therefore be controlled with novel metrics and models of evaluation that can determine when the software is at acceptable levels of quality and when not. Metrics and Models for

Evaluating the Quality and Effectiveness of ERP Software is a critical scholarly publication that examines ERP development, performance, and challenges in business settings to help improve decision making in organizations that have embraced ERPs, improve the efficiency and effectiveness of their activities, and improve their return on investments (ROI).

Highlighting a wide range of topics such as data mining, higher education, and security, this book is essential for professionals, software developers, researchers, academicians, and security professionals. Context, Challenges, and Prospects Springer Nature

Education has been progressing at a rapid pace ever since educators have been able to harness the power of mobile technology. Open-access learning techniques provide more students with the opportunity to engage in

educational opportunities that may have been previously restricted. Empowering Learners With Mobile Open-Access Learning Initiatives is an authoritative reference source that offers an engaging look at how mobile technologies are aiding educators in providing new, innovative ways to enhance student learning experiences. Featuring relevant topics such as switch access technology, digital portfolios, dual enrollment students, and place

conscious education, this is a reliable resource for academicians, educators, students, and practitioners that are interested in studying recent mobile education advancements. Series D, Discussion papers IGI Global This book explores the journey that Kenya has travelled as a nation since its independence on December 12, 1963. It seeks to advance understanding of the country's major

milestones in the postcolonial period, the challenges and the lessons that can be learned from this experience, and the future prospects. Kenya National Assembly Official Record (Hansard) Oxford University Press The delivery of quality education to students relies heavily on the actions of an institution ' s administrative staff. Effective leadership strategies allow for the continued progress of modern educational

initiatives. It is crucial to investigate how effective administrators lead their organizations in challenging and difficult times and promote the accomplishments of their organization. Research Anthology on Preparing School Administrators to Lead Quality Education Programs is a vital reference source that offers theoretical and pedagogical research concerning the management of educational systems on both the national and

international scale. It also explores academic administration as well as administrative effectiveness in achieving organizational goals. Highlighting a range of topics such as strategic planning, human resources, and school culture, this multi-volume book is ideally designed for educators, administrators, principals, superintendents, board members, researchers, academicians, policymakers, and students.
