This book shows the many facets of African engagements with the world. It starts from the premise that current global asymmetries ascribing Africa to a marginalized position are the effects of colonial and imperial pasts still lingering on. The decolonization process of the post-war structure which privileges the West in both political and economic terms. While new dependencies emerged, several old bonds were maintained and continue to influence African affairs quite strikingly. It is appropriate, then, to call these continued unequal relations between Africa and the West frankly 'neo-colonial'. This designation

applies all the more as the post-colonial states of Africa inherited a complex legacy of foreign rule – colonial frontiers, colonial languages, colonial infrastructure and authoritarian institutions, as well as the social intricacies and imbalances so characteristic of the 'colonial situation'. The contributions to this volume look at various aspects of these complex processes from intellectual history perspectives. The topics dealt with are manifold. Contributions deliberately attack key themes, ideas and discourses of an intellectual history of Africa ('state', 'modernity', 'development', 'dependency', 'art', etc.), and introduce important engaged public intellectuals from Africa and the

African diaspora. What is Africa, and how is she related to the rest of the world? How can she overcome her internal problems and her external dependencies? – These are perennial questions critically tackled by Africans throughout the 20th century. Dealing with various cases looked at from a variety of perspectives, the contributions to this book offer original insights into the intellectual history of Africa.

The volume is a collection of contributions by colleagues from Europe and North America to celebrate the 75th jubilee of two outstanding scholars in the domain of Semito-Hamitic (Afro-Asiatic) comparative linguistics. They are Professor Aharon B. Dolgopolsky (Haifa) and Professor Herrmann Junggraithmayr (Frankfurt am Main), who have so much in common in their approach to a better reconstruction of Semito-Hamitic. These studies by well-known specialists of Semitic, Berber, Cushitic and Omotic as well as Chadic linguistics are both comparative and descriptive in

nature and focus primarily on the lexicon.

Accounting Principles, Volume 1 Cambridge University Press

The call for gender equity in leadership has become a global concern. From a Christian perspective, all forms of gender prejudice are

sinful because they violate God's intention for creating both men and women in God's image. Although many Christian authors have published books and journal articles to address gender-based injustice, very few publications have approached the subject from an African perspective. This book is meant to fill the existing gap. With a specific reference to the African context, this book explores the phenomenon of equity in leadership from various dimensions, such as African culture and traditional religion, church tradition, biblical interpretation, as well as from the perspective of contemporary socio-economic and political realities in Africa. By giving vivid examples of success stories of men and women working together, the authors have demythologized the view that women cannot be leaders. In addition, this book is intended for general readership by Christian men and women throughout the globe. For universities and colleges that teach gender studies as a subject, the book can serve as a class text or reference resource. Seminaries and theological institutions will also find it handy for training and mentoring Christians to promote equity in the church, ministry, business, and family.

The director of the famed Bodleian Libraries at Oxford narrates the global history of the willful destruction—and surprising survival—of recorded knowledge over the past three millennia. Libraries and archives have been attacked since ancient times but have been especially threatened in the modern era. Today the knowledge they safeguard faces purposeful destruction and willful neglect; deprived of funding, libraries are fighting for their very existence. *Burning the Books* recounts the history that brought us to this point. Richard Ovenden describes the

deliberate destruction of knowledge held in libraries and archives from ancient Alexandria to contemporary Sarajevo, from smashed Assyrian tablets in Iraq to the destroyed immigration documents of the UK Windrush generation. He examines both the motivations for these acts—political, religious, and cultural—and the broader themes that shape this history. He also looks at attempts to prevent and mitigate attacks on knowledge, exploring the efforts of librarians and archivists to preserve information, often risking their own lives in the process. More than simply repositories for knowledge, libraries and archives inspire and inform citizens. In preserving notions of statehood recorded in such historical documents as the Declaration of Independence, libraries support the state itself. By preserving records of citizenship and records of the rights of citizens as enshrined in legal documents such as the Magna Carta and

the decisions of the US Supreme Court, they support the rule of law. In *Burning the Books*, Ovenden takes a polemical stance on the social and political importance of the conservation and protection of knowledge, challenging governments in particular, but also society as a whole, to improve public policy and funding for these essential institutions. *Cambridge Certificate in Advanced English 4 Student's Book* IGI Global

Since the historic Nuremberg Trial of

1945 an international customary law principle has developed that commission of a core crime under international law – war crimes, genocide, crimes against humanity and aggression – should not go unpunished. History shows, that when in Africa such violations occurred, especially as a result of election disputes, national and regional actors, including the African Union, resorted to political rather than legal responses. However, when crimes against humanity were alleged to have been committed in Kenya during the 2007-2008 post-election violence, a promising road map for criminal accountability was agreed upon alongside a political solution. In the spirit of this road map, the author

analyzes the post-election violence in Kenya from a legal point of view. He extensively examines legal options for domestic criminal accountability and discusses both retributive (prosecutions) and restorative justice (mainly truth commission) mechanisms, being the main legal responses to the gross violations of human rights. Furthermore, he thoroughly investigates the Kenya situation before the ICC and the legal-cum-political responses to the ICC intervention in Kenya. Practitioners and academics in the field of international criminal law and related disciplines, as well as political sciences and (legal) history will find in this book highly relevant information about alternative

legal approaches of the fight against and punishment of crimes against humanity, as defined under the ICC Statute.

Im Unterschied zu Kriegen zwischen Staaten und zu Bürgerkriegen werden tribale Kriege zwischen Dorfgemeinschaften ausgetragen, die noch nicht oder nicht mehr von einer staatlichen Zentralgewalt kontrolliert werden. Anhand von Beispielen unter anderem aus Neuguinea, Amazonien und Ostafrika untersucht Jürg Helbling die Verlaufsformen und Ursachen dieser Kriege. Wird Krieg durch

angeborene Aggressivität des Menschen, durch kulturelle Faktoren oder durch Erziehung verursacht? Steckt die Konkurrenz um knappe Ressourcen dahinter oder werden Kriege von politisch ambitionierten Führern angezettelt? Helbling entwickelt eine alternative Theorie des tribalen Krieges, die von Theorien der internationalen Beziehungen und der Spieltheorie inspiriert ist.

Gregory's remarkable career and his scientific work are detailed and critically assessed. Accounts of his heroic 1893 expedition to the Rift Valley (a term he coined) in Kenya (now the Gregory Rift), his first crossing of Spitzbergen, and his resignation as Leader of the first British Antarctic Expedition of 1901, when racing to the Pole under Scott became the

priority, draw on unpublished letters. While in Melbourne he published on mining geology and a series of geography textbooks. His 1901 Lake Eyre expedition in Central Australia initiated the phrase 'The Dead Heart of Australia' and controversy over the source of artesian water. In the Chair of Geology in Glasgow from 1904, he built up the largest first-year geology class in the UK, over 400 students. He worked in every field of geology and every continent except Antarctica. He was also involved with the search for a 'homeland' for the Jews in Libya and Angola. He shrewdly realized that Wegener's Continental Drift Theory erroneously supposed that the Pacific Ocean was wider than now before the Atlantic opened. This led to his influential rejection of Continental Drift. He

drowned in Peru traversing the Andes having published over 30 books and nearly 400 articles.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to

establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
