Based on recognition, evaluation, and exploitation of opportunities, entrepreneurship is a process that stimulates economic growth, provides us with new products and services, and serves as a

solution to low unemployment rates. Hence, many governments encourage their citizens to embrace entrepreneurship as a strategy to mitigate unemployment, particularly youth and graduate unemployment. While studies show that entrepreneurship education has yielded positive results in Western countries, in other parts of the world it seems that most students still prefer to seek paid employment in their career of choice.

Promoting Entrepreneurship to Reduce Graduate Unemployment seeks to expand understanding of the barriers

that face graduates in becoming entrepreneurs in various countries, examining the role of educational institutions in promoting graduate entrepreneurship and evaluating governments as well as other schemes that promote graduate entrepreneurship. Although it will not be a panacea for all the obstacles that impede graduate entrepreneurship, it is hoped that this book will illuminate the entrepreneurship career path, serve as a platform for further diagnosis for reducing graduate unemployment, and highlight areas in need of further research. Covering

topics such as entrepreneurial self-efficacy, career choice, and educated unemployment, it serves as a dynamic resource for educators, educational administration and faculty, government institutions, graduate students, student organizations, professionals, researchers, and academicians.

The plunging of Kenya, until recently a centre of stability and growth in East Africa, into political and economic uncertainty following the general election of December 2007 is regarded as a major cause for global and African concern. It is widely accepted

that the elections were deeply flawed, and that there was electoral malfeasance by all the major players. President Kibaki's rapid declaration of victory in the face of a heavily disputed election and his determination to hold on to the levers of state power precipitated a deadly crisis, communal violence and economic decline. A power-sharing deal between Kibaki and Opposition leader, Raila Odinga signed in February seems to be holding, but Kenya ranks among the worlds ' growing number of

democracies at-risk. This book takes a new look at the 2007 election, the post-election crisis, the underlying interaction of ethnicity, class and political power; forced displacement, the role of international forces; and the country ' s power-sharing arrangement. The study will draw upon the expertise of a variety of leading experts on Kenya, and will be edited by Peter Kagwanja and Roger Southall. The overall project was based on a workshop in Nairobi on 6-7 December 2008. This book was published as a special issue of the Journal of Contemporary African Studies.

Facing Mount Kenya, first published in 1938, is a monograph on the life and customs of the Gikuyu people

of central Kenya prior to their contact with Europeans. It is unique in anthropological literature for it gives an account of the social institutions and religious rites of an African people, permeated by the emotions that give to customs and observances their meaning. It is characterised by both insight and a tinge of romanticism. The author, proud of his African blood and ways of thought, takes the reader through a thorough and clear picture of Gikuyu life and customs, painting an almost

utopian picture of their social norms and the sophisticated codes by which all aspects of the society were governed. This book is one of a kind, capturing and documenting traditions fast disappearing. It is therefore a must-read for all who want to learn about African culture.

What is education for an unknowable future? In *Educating for Durable Solutions*, Christine Monaghan explores how refugees and policymakers have answered this

question over time by reconstructing the contemporary history of education in Kenya's Dadaab and Kakuma refugee camps. Through oral histories and archival research, Monaghan shows how, since the founding of both camps in 1991, refugees and policymakers have conceptualized, developed, implemented and changed refugee education programs. She also shows why and how, despite these changes, real challenges persist in refugee education in Dadaab, Kakuma, and other camps throughout the world; these include high numbers of out-of-school children and

youth, high student to teacher ratios, unpredictable funding, and persistent questions regarding what refugee education is for. The author shifts focus from debates over the impacts of specific policies and programs and explores instead how and why different policies and programs were implemented whether they led to meaningful changes in the long-standing challenges of refugee education. She finds that when and where real changes occurred, individuals or small groups of refugees and policymakers acted with tremendous agency and as tireless advocates.

This lively introductory text exposes the student in the humanities to the world of discrete mathematics. A problem-solving based approach grounded in the ideas of George Pólya are at the heart of this book. Students learn to handle and solve new problems on their own. A straightforward, clear writing style and well-crafted

examples with diagrams invite the students to develop into precise and critical thinkers. Particular attention has been given to the material that some students find challenging, such as proofs. This book illustrates how to spot invalid arguments, to enumerate possibilities, and to construct probabilities. It also presents case studies to students about the possible detrimental effects of ignoring these basic principles. The book is invaluable for a discrete and finite mathematics course at the freshman undergraduate level

or for self-study since there are full solutions to the exercises in an appendix. "Written with clarity, humor and relevant real-world examples, Basic Discrete Mathematics is a wonderful introduction to discrete mathematical reasoning." - Arthur Benjamin, Professor of Mathematics at Harvey Mudd College, and author of The Magic of Math BHU Banaras Hindu University L.L.B Entrance Exam 2020 CRC Press

The collective inquiries in this volume address ethnicity in ancient Africa as social fact and political artifact along numerous

dimensions. Is ethnicity a useful analytic? What can archaeology say about the kinds of deeper time questions which scholars have asked of identities in Africa? Eleven authors engage with contemporary anthropological, historical and archaeological perspectives to examine how ideas of self-understanding, belonging, and difference in Africa were made and unmade. They examine how these intersect with other salient domains of social experience: states, landscapes, discourses, memory, technology, politics, and power. The various chapters cover broad geographic and temporal ground, following an arc across Senegal, Mali, Nigeria, Cameroon, the Democratic Republic of Congo,

Rwanda, and East Africa, spanning from prehistory to the colonial period.

University (Anthropology),

course: Anthropology,

language: English, abstract:

When a person joins a social organization, it is imperative that they adapt to prosper.

Change of values ordinarily occurs through compliance where one entertains and accepts the influence of comrades as they hope for

favorable reactions from peers. This study was an examination of behavioral change in response to customary university values and roles) among students of Moi University main campus. The key objective was to examine factors determining behavioral change among students in Moi University. It examined the adaptive behavioral responses of students to university environmental impediments and explored strategies to encourage positive behavior development. The paper argues that students are	disposed to adopt negative behavior at the University.
