The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all Subjects: political, economic and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Pushing the Limits Rocky Mountain Books Ltd

On January 20, 2003, at 10:45 a.m., a massive avalanche in the Selkirk Range of British Columbia struck three members of two guided backcountry skiing groups and buried them. After a frantic hour of digging by those still

standing, an unthinkable outcome became reality: seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and newspaper pages. The official analysis was that guide error was not a contributing factor in the accident. This interpretation was insufficient for some of the victims' families, the public and some members of the guiding community. Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way as well as the peace that comes from accountability and the personal growth that results from understanding.

Sport, Outdoor Life and the Nordic World explores the Nordic model of sport and outdoor life with respect to such issues as sport facilities, mountain guiding, women and ethnic minorities, urban planning, anti-doping, health, elite sport coaching and leadership, and the globalization of sport. The aims of the volume are twofold. First, it advances knowledge of Nordic sport and outdoor life, as important fields of social activity in their own rights. Second, it enhances the understanding of the 'Nordic model' of society, and the ways in which this is constructed, explored and challenged within and through sport and outdoor life activities. In doing so, the contributors explore a range of key themes, notably: how modern Nordic sport and outdoor life activities emerged and are organized through specific social policies; how they may challenge or harbour forms of social exclusion, particularly in regard to gender or minority populations; how they are affected by, and respond

to, deviant practices such as doping; how they may contribute to alleviating social problems; and how they confront major structural challenges and changes, such as the impacts of globalization and the continuing dominance of neoliberal economic policies. Interdisciplinary in approach, *Sport, Outdoor Life and the Nordic World* is essential reading for those studying Nordic sports and societies, and will also appeal to students, academics and wider readers with interests in sport studies, sociology, social policy, cultural studies, anthropology and public health. The chapters were originally published as a special issue of *Sport in Society*.
