Born and raised in a stark, coastal village on the shore of the Ice-Rimmed Sea, Bera is the daughter of a Valla, the Vikings' most powerful seers. But her mother died when she was young, leaving Bera alone with her gift, unable to control her feckless twin spirit or understand her visions of the future. When this inability leads to the death of her childhood friend at the hands of a rival clan, Bera vows

revenge. And learning that her father has sold her into marriage with the murderous enemy's chieftain, she is presented with an opportunity even sooner than she had hoped... As her powers grow stronger, her visions of looming disaster become more and more ominous until she is faced with the ultimate choice: will she exact vengeance? Or can she lead her people to safety before it's too late?

Bestselling author Tad Williams broke new ground in 1996 with his wonderfully imaginative novel CITY OF GOLDEN SHADOW. The place is an incredibly

complex and detailed virtual reality, home to the wildest dreams and darkest nightmares of its users and creators. The conspiracy threatens to sacrifice our Earth for the promise of this far more exclusive place. And, somehow, Otherland is claiming the Earth's most valuable source, its children. Then came RIVER OF BLUE FIRE: OTHERLAND BOOK 2, which firmly established the series as a landmark in imaginative fiction, challenging and

thrilling even more readers. Now, in MOUNTAIN OF BLACK GLASS: OTHERLAND BOOK 3, Tad Williams demonstrates ever greater virtuosity, entering ever more deeply into the conspiracy and the rich world of Otherland. To Green Angel Tower Random House Group In his groundbreaking new book Daniel Everett seeks answers to questions that have perplexed thinkers from Plato to Chomsky: when and how did language begin? what is it? and what is it for? Daniel Everett confounds

the conventional wisdom that language originated with Homo sapiens 150,000 years ago and that we have a 'language instinct'. Drawing on evidence from a wide range of fields, including linguistics, archaeology, biology, anthropology and neuroscience, he shows that our ancient ancestors, Homo erectus, had the biological and mental equipment for speech one and half million years ago, and that their cultural and technological achievements (including building ocean-going boats) make it overwhelmingly likely they spoke

some kind of language. How Language Began sheds new light on language and culture and what it means to be human and, as always, Daniel Everett spices his account with incident and anecdote. His book is convincing, arresting and entertaining. *Rite* DAW Hardcover Angel Bobby Dollar sets out to rescue his girlfriend Casimira being held hostage in the netherworld by the demon Eligor while

Through

painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector.
