The purpose of this manual is to  
provide clear and helpful  
information for maintaining  
gravel roads. Very little  
technical help is available to  
small agencies that are  
responsible for managing these  
roads. Gravel road maintenance  
has traditionally been "more of  
an art than a science" and very  
few formal standards exist. This  
manual contains guidelines to  
help answer the questions that  
arise concerning gravel road  
maintenance such as: What is  
enough surface crown? What is  
too much? What causes  
corrugation? The information is  
as nontechnical as possible  
without sacrificing clear  
guidelines and instructions on  
how to do the job right.
