Written in an easy-to-understand  
style, the text has been  
thoroughly revised in tune with  
the spirit and need of the new  
nomenclature Pedagogy of Social  
Sciences in place of the old  
designation Teaching of Social  
Studies. It reflects on the  
theoretical knowledge and  
practical skills required to teach  
Social Sciences in an effective  
manner. Introducing new  
chapters, the second edition of the  
book mainly focuses on  
improving the methodological  
concepts of the Social Sciences  
teachers. In doing so, it covers  
various strategies and devices of  
teaching Social Sciences, e-  
learning in Social Sciences, e-  
learning resources in Social  
Sciences, and professional growth  
of the Social Sciences teacher.  
Besides, the chapters of the  
previous edition have been  
updated, with the required  
information given in various new  
sections. This book is suitable for  
a course on 'Pedagogy of Social  
Sciences' for the students of  
B.Ed. and M.A. (Education). It  
can also be used for the in-service

teacher education programmes organized by the Central and State education boards. NEW TO THE SECOND EDITION ? In addition to the four new chapters, the book now incorporates several new sections: • Concept and meaning of the term Social Sciences; distinguishing the subject Social Sciences from Natural Sciences and the subject Social Studies; justification for using the term teaching/pedagogy of Social Sciences in place of teaching/pedagogy of Social Studies (Chapter 1) • Bloom's revised taxonomy, 2001 (Chapter 4) • Views of NCF and Focus Group (NCERT) about curriculum at the various stages of school education (Chapter 5) • Survey method and cooperative learning method for the teaching of Social Sciences (Chapter 7) • Reference books in Social Sciences (Chapter 9) • Atlases, newspapers, digital audio recorders and players and documentaries as instructional material or teaching aids (Chapter 11) • Question banks, grading system, open book examinations and use of rubrics as the means and ways for improving the evaluation programmes in Social Sciences (Chapter 23) ? Also, the chapter on 'Relationship of Social Studies with other Subjects' has been replaced with a more comprehensive and detailed chapter on 'Correlation in Social Sciences' (Chapter 6). KEY FEATURES ? Chapter-end summary and study questions to help readers review the important topics and drill the concept discussed, respectively. ? Numerous figures and tables to facilitate easy understanding of the concepts. ? References and

 Genetics today is inexorably focused on DNA. The theme of Introduction to Genetics: A Molecular Approach is therefore the progression from molecules (DNA and genes) to processes (gene expression and DNA replication) to systems (cells, organisms and populations). This progression reflects both the basic logic of life and the way in which modern biol  
Cases on Digital Technologies in Higher Education: Issues and Challenges New Saraswati House India Pvt Ltd  
 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27–29 September 2017. The authors are currently

witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

Geographical Knowledge Construction and Production: Teacher and Student Perspectives is a readable and illuminating account of three high school classrooms in suburban Atlanta, Georgia. It challenges the narrow focus of the Advanced Placement (AP) programme as a tool for admission into colleges and universities in the United States. The research provides insight into the College Board's AP programme and argues for teaching and learning that is transformative and geared toward equipping students with the skills and knowledge necessary to confront the challenges of the 21st century.

In particular, it advocates for geographic education that is anchored in the structure of the subject, teasing wherever possible, the contradictions and tensions embedded in the complexities of facts relating to people and places. This book is essential reading for professors and students of education, teachers and students of AP courses, parents, administrators, and state and federal agencies vested in the AP programme.
