Quantitative Aptitude for Competitive Examinations

Disha Publications

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law - the law affecting information and communication technology (ICT) - in India covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure.

Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal

protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in India will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

About the book ETHICS IN GOVERNANCE Amidst modern complexities and riddles, executives and organizational heads face immense ethical dilemmas in their decision-making. Circumstantial adversaries pose unique challenges and threats to their conscience and leadership abilities. This book tends to address such dilemmas, threats and challenges in a rather systematic and elucidate manner. It attempts to construct perspectives that may find practical solutions to governance rigor and internal moral conflicts. This is a book full of people, almost

too many of them who took part in a national seminar on 'Ethical dimensions of governance' organized at India International Centre: executives, politicians, jurists, media people, medical practitioners, academicians, and organizational heads. Those who were philosophically as well as emotionally interested in the inter-faith debate and who believed in trying to create a synthesis of different belief systems on governance. So there is a kind of internal moral dialogue and deliberations that are captured by the authors. There are countless anecdotes, some humorous and some poignant, and they are fascinating also because such people have never been so exuberant in the public eye anyway. Individuals who are responsible for good governance and deep-down care ethical practices and human values would get enough impetus reading this book. It is also meant to benefit those who want to understand the realities of governance and based up on that want to frame their own philosophy of work and life. This book would further be useful to students and professionals who would like to learn the pitfalls of governance and there-upon set benchmarks for their future endeavors. Nevertheless, if you are unhappy allowing your trinity (intellect, soul and heart) to do the talking in the context of governance then this text cannot be recommended. Governance:- Public Policy • Corporate Sector • Public Sector • Health Care • Banking Industry • Environment Sector • Leadership challenging corruption • Tasks and Solutions for the Future.

INDIAN POLITY Universities Press

In this novel the author draws back the curtains on a deeply felt and ongoing tradition. Through the eyes of the main character, Geeta, she goes behind the scenes into a way of life that has long been shrouded in mystery. When Geeta, an educated, outgoing young woman from Bombay, marries into a staunchly traditional family, she suddenly finds herself forced to live in purdah in her husband's ancient home, the haveli. Unable to escape from the conservative customs that now define her life, she struggles to hold on to the modern values she has grown to cherish. Can she discover new meaning and dignity in what at first seems to her a strange and stultifying existence?

Operating systems are an essential part of any computer system. Similarly, a course on operating systems is an essential part of any computer-science education. This book is intended as a text for an introductory course in operating systems at the junior or senior undergraduate level, or at the first year graduate level. It provides a clear description of the concepts that underlie operating systems. In this book, we do not concentrate on any particular operating system or hardware.

The Maharashtra Secondary and Higher Secondary Education Boards Act, 1965 Harmony

If you could send a letter back through time to your younger self, what would the letter say? In this moving collection, forty-one famous women write letters to the women they once were, filled with advice and insights they wish they had had when they were younger. Today show correspondent Ann Curry writes to herself as a rookie reporter in her first job, telling herself not to change so much to fit in, urging her young self, "It is time to be bold about who you really are." Country music superstar Lee Ann Womack reflects on the stressed-out year spent recording her first album and encourages her younger self to enjoy the moment, not just the end result. And Maya Angelou, leaving home at seventeen with a newborn baby in her arms, assures herself she will succeed on her own, even if she does return home every now and then. These remarkable women are joined by Madeleine Albright, Queen Noor of Jordan, Cokie Roberts, Naomi Wolf, Eileen Fisher, Jane Kaczmarek, Olympia Dukakis, Macy Gray, and many others. Their letters contain rare glimpses into the personal lives of extraordinary women and powerful wisdom that readers will treasure. Wisdom from What I Know Now "Don't let anybody raise you. You've been raised." —Maya Angelou "Try more things. Cross more lines." —Breena Clarke "Learn how to celebrate." —Olympia Dukakis "You don't have to be afraid of living alone." —Eileen Fisher "Please yourself first . . . everything else follows." —Macy Gray "Don't be so quick to dismiss another human being." —Barbara Boxer "Work should not be work." —Mary Matalin "You can leave the work world—and come back on your own terms." —Cokie Roberts "Laundry will wait very patiently." —Nora Roberts "Your hair

matters far, far less than you think" —Lisa Scottoline "Speak the truth but ride a fast horse." —Kitty Kelley

Chemistry For Middle Class-8 (Book-III) S. Chand Publishing

A scholar of world religions investigates religiously motivated violence that occurred in medieval Tibet and Bhutan, as well as in modern India, Sri Lanka, Burma, and Japan. The fusion of religious and national identity in high lamas and divine kings has caused just as much violence in Asia as it did in Europe and the Middle East.

Multiple Representations in Biological Education Springer

This book explores how the transnational Education for Sustainable Development (ESD) policy is being translated into formal school education in India. Stephanie Leder investigates the ESD's transformative potential for pedagogic practice and builds a set of principles for how the global objectives of the ESD can be interpreted in diverse socio-cultural contexts. Her approach for transformative pedagogic practice emphasizes the promotion of a critical consciousness through argumentation skills. Using the case of water conflicts in geography education in India, the book reveals the contradictions between ESD objectives and curricula, syllabi, textbooks and classroom teaching at secondary schools in Pune, Maharashtra. Leder's approach demonstrates how principles of schooling can be altered towards learner-centered, problem-posing and network-thinking teaching approaches to empower students towards reflective decision-making on the sustainable use of natural resources.

Anoop Srivastava, Er. Sunil Batra, Mamta Batra, Er. Sanjay Bhatnagar etc.

Being Fluent with Information

Technology National Academies Press
This new publication in the Models and Modeling in Science Education series synthesizes a wealth of international research on using multiple representations in biology education and aims for a coherent framework in using them to improve higher-order learning. Addressing a major gap in the literature, the volume proposes a theoretical model for advancing biology educators' notions of how multiple external representations (MERs) such as analogies, metaphors and visualizations can best be harnessed for improving teaching and learning in biology at all pedagogical levels. The content tackles the conceptual and linguistic difficulties of learning biology at each level—macro, micro, sub-micro, and symbolic, illustrating how MERs can be used in teaching across these levels and in various combinations, as well as in differing contexts and topic areas. The strategies outlined will help students' reasoning and problem-solving skills, enhance their ability to construct mental models and internal representations, and, ultimately, will assist in increasing public understanding of biology-related issues, a key goal in today's world of pressing concerns over societal problems about food, environment, energy, and health. The book concludes by highlighting important aspects of research in biological education in the post-genomic, information age.

An Autobiography Cambridge University Press
Computers, communications, digital information, software—the constituents of the information age—are everywhere. Being computer literate, that is technically competent in two or three of today's software applications, is not enough anymore. Individuals who want to realize the potential value of information technology (IT) in their everyday lives need to be computer fluent—able to use IT effectively today and to adapt to changes tomorrow. Being Fluent with Information Technology sets the standard for what everyone should know about IT in order to use it effectively now and in the future. It explores three kinds of knowledge—intellectual capabilities, foundational concepts, and skills—that are essential for fluency with IT. The book presents detailed descriptions and examples of current skills and timeless concepts and capabilities, which will be useful to individuals who use IT and to the instructors who teach them.
