They thought they could contain it. The Chinese fell, then Asia, then it hit Europe and destroyed the Middle East. Not America. The shining city on the hill opened its doors to the sick and scared of the world with the message "Come to America. We can beat this together." In any other time America would have been right to do so. But this time the refugees brought the Zombie virus, and the first bite is deadly...

A dual language edition in English and French. The genocide in Rwanda shocked the world. Back then, Ery Nzaramba was only a teenager and his family's escape to Europe turned him into a "survivor". How should he now respond to questions about who he is and where he comes from? In this autobiographical one-man play, performed to acclaim on the Edinburgh Festival Fringe, the author journeys back to his Rwandan childhood. With the help of a cassette player, he brings to life nearly a dozen characters, exploring memories of kinship, cultural attitudes and personal identity. Both funny and poignant, the play highlights not only the intolerance that can breed violence and war but also the importance of power and privilege in the struggle for survival. Le génocide au Rwanda a choqué le monde. À l'époque, Ery Nzaramba était un adolescent. Après que sa famille se fut échappé en Europe, il est devenu un « survivant ». Désormais, que doit-il répondre à des questions sur qui il est et d'où il vient? Dans ce one-man show autobiographique, salué par la critique lors de sa présentation au Festival d'Édimbourg, l'auteur retourne vers son enfance au Rwanda. Accompagné d'un lecteur cassette, il donne vie à une bonne douzaine de personnages, explorant souvenirs de famille et d'affinités, attitudes culturelles et identité. À la fois poignante et pleine d'humour, la pièce met en lumière non seulement l'intolérance qui peut engendrer violence et guerre, mais aussi l'importance du privilège dans la lutte pour la survie. ERY NZARAMBA Ery Nzaramba left Rwanda to settle in Belgium in 1994. Ten years later he moved to the UK for an acting career. In 2014 Ery started working with director Peter Brook and long-time collaborator Marie-Hélène Estienne, featuring in world tours of Battlefield and The Suit. Ery has been awarded two Grants for the Arts by Arts Council England and an Arvon Grant for his writing. He has written and directed short films; Split/Mixed is his first piece written for theatre. He wrote the first draft in 2013 and was invited to perform it in New York, Berlin, and Belfast. The play continued to be developed and its current version premiered to critical acclaim at the Edinburgh Fringe Festival in 2016. "Every time someone asks where I'm from, it's a reminder of how lucky and privileged I've been. In 1994 Rwanda was in the news for all the wrong reasons. It was being torn apart by a civil war and a genocide. Unlike millions of others who couldn't, my family escaped. Because we could. And we got all the support in the world because we were "refugees". But were we, really? Would I be able to look in the eye of one of the other millions of Rwandans who couldn't leave the country and say "I'm a refugee"? I've lived in Europe for nearly a quarter of a century now, and though I'm no longer a refugee, that question has continued to haunt me. So I decided to write Split/Mixed." Praise for his work: "Hilarious, harrowing and acutely moving...[An] essential, coruscating work" ?\*\*\*\* The Stage "An extraordinary one-man play (...) Split/Mixed is deeply moving, even harrowing at times. But it is also extremely funny... ?www.wordswithjam.co.uk

Die untersuchte App what3words stellt aufgrund eines neuen Konzepts des Teilens von Geo-Koordinaten und ihrer zunehmenden Verbreitung ein interessantes Analyseobjekt dar. Insbesondere ein möglicher Verlauf und persistente Artefakte haben in forensischer Hinsicht schon heute eine besondere Bedeutung. Das in der App verwendete Telemetrie-Framework Android Firebase erfasst nahezu alle Nutzerinteraktionen und speichert diese nicht nur lokal in Datenbanken. Auch der Netzwerkverkehr zeigt die Übertragung von Details zur App-Nutzung und gespeicherte Adressen sowie dem Austausch von Account-Datenfeldern. Diese Arbeit entstand im Rahmen des Moduls „ Browser- und Anwendungsforensik “ im berufsbegleitenden Masterstudiengang „ Digitale Forensik “ im Sommersemester 2021 in Zusammenarbeit von Lena Maxi Schneider, Andreas Schleicher, Janik Rebell und Marc Kasberger. Dabei sollte eine ausgewählte Android-Anwendung, hier what3words, forensisch untersucht werden.

form - buckminsterfullerene (C60) and its relatives, the fullerenes (C24, C28, C32, C70 etc). The story of fullerene chemistry, physics and materials science began in 1985, almost twenty years after the existence of a spherical carbon cluster was first considered. In September 1985 a joint Sussex/Rice Universities team including Kroto, Heath, O'Brien, Curl and Smalley used a powerful mass spectrometric technique to identify the C+60 species, and proposed a spherical structure and the name buckminsterfullerene. It was not, however, until Krätschmer and Huffman reported the isolation of crystals of C60 in 1990 that the closed cage structure of C60 could be confirmed. The Fullerenes documents the work leading up to 1990 and more recent developments in the field of fullerene research and will serve as an indispensable reference tool for all workers in this area.

Remote Sensing of Drought: Innovative Monitoring Approaches presents emerging remote sensing-based tools and techniques that can be applied to operational drought monitoring and early warning around the world. The first book to focus on remote sensing and drought monitoring, it brings together a wealth of information that has been scattered throughout the literature and across many disciplines. Featuring contributions by leading scientists, it assembles a cross-section of globally applicable techniques that are currently operational or have potential to be operational in the near future. The book explores a range of applications for monitoring four critical components of the hydrological cycle related to drought: vegetation health, evapotranspiration, soil moisture and groundwater, and precipitation. These applications use remotely sensed optical, thermal, microwave, radar, and gravity data from instruments such as AMSR-E, GOES, GRACE, MERIS, MODIS, and Landsat and implement several advanced modeling and data assimilation techniques. Examples show how to integrate this information into routine drought products. The book also examines the role of satellite remote sensing within traditional drought monitoring, as well as current challenges and future prospects. Improving drought monitoring is becoming increasingly important in addressing a wide range of societal issues, from food security and water scarcity to human health, ecosystem services, and energy production. This unique book surveys innovative remote sensing approaches to provide you with new perspectives on large-area drought monitoring and early warning.

Die Beweismittelkette oder auch „Chain of Custody“ beschreibt in der allgemeinen Forensik die bestenfalls lückenlose Dokumentation des Verlaufs eines Beweismittels, um dessen Ablauf nach-vollziehen und Manipulationsmöglichkeiten ausschließen zu können. Dadurch ist es bestenfalls möglich, dem Beweismittel und den daraus resultierenden Beweisen im Rahmen eines möglichen Gerichtsverfahrens einen entsprechenden Beweiswert zuzusprechen. Ist diese Beweismittelkette hingegen nicht lückenlos vorhanden und es besteht die Möglichkeit einer Manipulation, kann dies dazu führen, dass ein Beweismittel, beispielsweise in einem Strafverfahren, nicht verwertet werden darf oder dessen Beweiswert stark angezweifelt werden muss. Anhand persönlicher Erfahrungen sowie Erhebungen bei Strafverfolgungsbehörden und Forensik-Dienstleistern konnte im Rahmen der vorliegenden Arbeit festgestellt werden, dass die Beweismittelkette derzeit überwiegend händisch protokolliert wird - teilweise analog bzw.

handschriftlich oder auch digital in entsprechenden Softwarelösungen. Dies bindet, auch bei bestmöglichen Abläufen, anderweitig benötigtes Personal oder geht zu Lasten der Vollständigkeit einer Beweismittelkette, je nach Ausgestaltung. Der Mensch wird im Rahmen der Beweismittelkette für komplexere Aufgaben benötigt als das reine Dokumentieren von Abläufen, was dennoch lückenlos durchgeführt werden sollte. Dies ist der Grundgedanke, der zu der Abfassung der vorliegenden Arbeit führte. Diese wichtige Aufgabe der Beweismittelkettenerfassung, welche für die Aussagekraft von Beweismitteln entscheidend sein kann, sollte im 21. Jahrhundert nicht von fortwährender menschlicher Arbeit getragen, sondern dringlichst überarbeitet und soweit möglich automatisiert werden. Hierzu ergeben sich mehrere Anknüpfungspunkte, die eine Optimierung und Automatisierung unter Nutzung der derzeit vorhandenen technischen Möglichkeiten ermöglichen. So konnten verschiedene solcher erarbeitet und in einem erstellten Rohsystem etabliert sowie in einer Testumgebung überprüft werden. Hier kamen beispielsweise kontakt- und aufwandslose Erfassungen über RFID-Reader zum Einsatz, deren automatisierte Protokollerstellung in einer Datenbank gespeichert und mittels Blockchain-Technologie gegen nachträgliche Manipulationen abgesichert wurde. Dies sind jedoch nur einzelne Kernpunkte, wie der teilweise festgestellte Stand der Beweismittelkette verbessert und über Automatisierung an die Abläufe des 21. Jahrhunderts angepasst werden kann. Diese sollten als Grundlage für weitere Überarbeitungen dienen und Denkanstöße zu zeitgemäßen Verfahrensweisen geben.
