Using their proven question and answer format, the latest edition of Field Instruction retains the authors' established approach and paves the way for students to move out of the classroom and into their internships. Pragmatic suggestions and ways to troubleshoot potential problems in their practicum guide students to the successful completion of their field experience. New or expanded topics include CSWE's 2015 Competencies and Associated Behaviors, social media, electronic medical records,

cultural competence, suicide, domestic violence, child and elder abuse, and professional behavior. Many new, topically relevant, suggested readings have been added throughout the text. This accessible guide begins by addressing questions about partnering with local service agencies and preparing for the first interview before it delves into juggling responsibilities and practical problems such as assessing the needs of diverse clients. The authors integrate classroom knowledge and real-world settings by providing case examples, critical thinking questions, and exercises throughout the text. Each chapter's coverage is linked to CSWE's 2015 Competencies and Behaviors. End-of chapter practice tests gauge mastery of chapter content. These outstanding features augment students' understanding of different aspects of social work and challenge them to think about how they would react to real-life experiences in the field.

Children in today's world are inundated with information

about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Students use actual data collected from their field experience to help them connect the importance of research to their own practice interests. Russell frames her approach to research and evaluation, not as an abstract exercise in accountability, but instead as a tool to empower social service agencies. Rather than weighing students down with every possible test and procedure, this book walks readers through each

discrete step of the research process and presents only the information they need to know when they need to know it! The book's casual tone and playful attitude allays students' anxieties and helps them not only understand the purpose of research but actually develop their own passion for the practice.

Social work practitioners write for a variety of publications, and they are expected to show fluency in a number of related fields. Whether the target is a course instructor, scholarly journal, fellowship organization, or general news outlet, social workers must be clear, persuasive, and comprehensive in their writing, especially on provocative subjects. This first-of-its-kind guide features top scholars and educators providing a much-needed introduction to social work writing and scholarship. Foregrounding the process of social work writing, the coeditors particularly emphasize how to think about and approach

one's subject in a productive manner. The guide begins with an overview of social work writing from the 1880s to the present, and then follows with ideal strategies for academic paper writing, social work journal writing, and social work research writing. A section on applied professional writing addresses student composition in field education, writing for and about clinical practice, the effective communication of policy information to diverse audiences, program and proposal development, advocacy, and administrative writing. The concluding section focuses on specific fields of practice, including writing on child and family welfare, contemporary social issues, aging, and intervention in global contexts. Grounding their essays in systematic observations, induction and deduction, and a wealth of real-world examples, the contributors describe the conceptualization, development, and presentation of social work writing in ways that better secure its power and relevance.
