The aim of this publication is to present how Open Educational Resources (OERs) are being strongly promoted at all levels of education. This book presents a select number of case studies from contributors to the Irish National Digital Learning Resources (NDLR) service. The NDLR service was launched as a pilot project in 2005 and in the last 7 years has grown significantly. Its mission is to "promote and support Higher Education sector staff in the collaboration, development and sharing of learning resources and associated teaching practices for the advancement of academic scholarship in Ireland". The NDLR is a unique inter-institutional community, fostering the sharing and exchange of teaching and learning experiences, practices and resources, and collaborative research and development initiatives across the Irish Higher Education sector. The service promotes and supports the sharing and creation of OERs amongst the academic community in Ireland. The NDLR, through the local Institutional representative, provides support and encourages the development and sharing of reusable teaching and learning resources to members of academia through the coordination of a number of local initiatives and local supports across 21 Irish Higher Education Institutes.

An account of how children learn L2s in formal contexts and how that knowledge impacts on the design, development, and evaluation of their language assessment products.

[The ETS Test Collection Catalog: Achievement tests and measurement devices](#) Greenwood

Understanding Language Testing presents an introduction to language tests and the process of test development that starts at the very beginning. Assuming no knowledge of the field, the book promotes a practical understanding of language testing using examples from a variety of languages. While grounded on solid theoretical principles, the book focuses on fostering a true understanding of the various uses of language tests and the process of test development, scoring test performance, analyzing and interpreting test results, and above all, using tests as ethically and fairly as possible so that test takers are given every opportunity to do their best, to learn as much as possible, and feel positive about their language learning. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics and language education, or anyone in a related discipline looking for a first introduction to language testing.

Professional translators are increasingly dependent on electronic resources, and trainee translators need to develop skills that allow them to make the best use of these resources. The aim of this book is to show how CULT (Corpus Use for Learning to Translate) methodologies can be used to prepare learning materials, and how novice translators can become autonomous users of corpora. Readers interested in translation studies, translator training and corpus linguistics will find the book particularly useful. Not only does it include practical, technical advice for using and learning to use corpora, but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility. Not only is this a good introduction to CULT, but it also incorporates the latest developments in this field, showing the advantages of using these methodologies in competence-based learning.

[Cloze - Practice](#) Springer Science & Business Media

Language is magic. This magic happens when new ideas come to our minds or when we come across notions which are new to us, i.e. when we use language productively and construct our own world. The magic (in the productivity) of language works in various linguistic areas, e.g. phonetics, lexicology, phraseology, pragmatics, languages for specific purposes and multilingualism. In language teaching and learning, this magic comes into effect when language meets content, when we try to adapt our teaching to our learners' needs or when we need to leave our comfort zone to take risks. With contributions by Lizeta Demetriou, Bessie Dendrinou, Olga Dobrunoff, Rashit Emini, Douglas Fleming, Thomas H. Goetz, Ourania Katsara, Bernd Klewitz, Katrin Menzel, Torten Piske, Lea Pöschik, Ronald Kresta, Nikolay Slavkov, Anja Steinlen, and Brikena & Gëzim Xhaferi, this edited volume features articles that cover a diversity of research findings which deal with the magic of language in various contexts and linguistic settings in Europe, America and Asia.

This book is intended for anyone who is seriously interested in designing and validating multiple-choice test items that measure understanding and the application of knowledge and skills to complex situations, such as critical thinking and problem solving. The most comprehensive and authoritative book in its field, this edition has been extensively revised to include: *more information about writing items that match content standards; *more information about creating item pools and item banking; *a new set of item-writing rules (with examples) in chapter 5, as well as guidelines for other multiple-choice formats; *hundreds of examples including an expanded chapter 4 devoted to exemplary item formats and a new chapter 6 containing exemplary items (with author annotations); *a chapter on item generation (chapter 7) featuring item modeling and other procedures that speed up item development; and *a more extensive set of references to past and current work in the area of multiple-choice item writing and validation. This book will be of interest to anyone who develops test items for large-scale assessments, as well as teachers and graduate students who desire the most comprehensive and authoritative information on the design and validation of multiple-choice test items.

The fourth edition of this comprehensive resource helps future and practicing teachers recognize and assess literacy problems, while providing practical, effective intervention strategies to help every student succeed. The author thoroughly explores the major components of literacy, providing an overview of pertinent research, suggested methods and tools for diagnosis and assessment, intervention strategies and activities, and technology applications to increase students' skills. Discussions throughout focus on the needs of English learners, offering appropriate instructional strategies and tailored teaching ideas to help both teachers and their students. Several valuable appendices include assessment tools, instructions and visuals for creating and implementing the book's more than 150 instructional strategies and activities, and other resources.

This collection of essays, given at Exeter at the seventh biennial international CALL Conference in 1997, presents a timely contribution to current research on the use and development of Multimedia in Computer-Assisted Language Learning. The papers are essential reading for all those who wish to keep abreast of the 'state-of-the-art' and who seek ideas for new avenues of research.

[Examining Young Learners: Research and Practice in Assessing the English of School-age Learners](#) Resources in Education Mastering 11+ Cloze - Practice

Constructing test items for standardized tests of achievement, ability, and aptitude is a task of enormous importance. The interpretability of a test's scores flows directly from the quality of its items and exercises. Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance, or errors of measurement, and thereby increases a test score's reliability. The aim of this entire book is to increase the test constructor's awareness of this source of measurement error, and then to describe methods for identifying and minimizing it during item construction and later review. Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years. Yet, in many writers' zeal to be 'curriculum-relevant' or 'authentic' or 'realistic', the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them. This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions, as one chapter is devoted to these alternative formats. This book addresses major issues in constructing test items by focusing on four ideas. First, it describes the characteristics and functions of test items. A second feature of this book is the presentation of editorial guidelines for writing test items in all of the commonly used item formats, including constructed-response formats and performance tests. A third aspect of this book is the presentation of methods for determining the quality of test items. Finally, this book presents a compendium of important issues about test items, including procedures for ordering items in a test, ethical and legal concerns over using copyrighted test items, item scoring schemes, computer-generated items and more.

Productivity in Linguistics and Language Teaching Tata McGraw-Hill Education

This popular series gives teachers practical advice and guidance, along with resource ideas and materials for the classroom. The tasks and activities are clearly presented, and offer teachers the information they need about level, time, preparation, materials, classroom management, monitoring, and follow-up activities. Each book offers up to 100 ideas, as well as variations that encourage teachers to adapt the activities to suite their individual classrooms.

Curriculum Development for Legal English Programs John Benjamins Publishing

The fifteen tests in this book are designed to be used either with a teacher or for self-study. In a classroom situation, teachers can use the tests for general revision / consolidation purposes. Students working on their own can also test their knowledge of vocabulary and grammar while checking their answers in the answer key. Each test consists of 5 exercises, making a total of 35 questions. Exercise 1 tests knowledge of key grammar points in a multiple-choice format. Exercise 2 requires students to identify and correct a mistake. Exercise 3 is a classic cloze, testing knowledge of grammar and vocabulary in the context of a short text. Exercise 4 consists of 5 multiple-choice vocabulary questions. Exercise 5 requires students to write the missing word in a sentence (the first and last letters are given). The grammar points and the vocabulary items are all based on the B1 level syllabus as defined by the Common

European Framework on Languages.
